Exploring Higher Vocational Software

Technology Education offers a comprehensive analysis of the current landscape of software technology education in Chinese vocational colleges. It addresses the challenges and opportunities in cultivating skilled software professionals in the rapidly evolving digital economy. The book covers key areas such as curriculum design, practical teaching, and faculty development, providing actionable insights for educators, administrators, and policymakers. Through comparative analysis with international best practices, it offers recommendations for optimizing software technology education to better meet industry demands. The book also features case studies highlighting innovative approaches, such as school-enterprise collaboration and project-driven learning, which are essential in bridging the gap between theory and practice. This work serves as a valuable reference not only for Chinese educators but also for an international audience interested in understanding China's vocational education model and how it can inform global education reform. Whether you're an academic, a practitioner, or a policymaker, this book offers practical pathways for enhancing the quality of technical talent development in today's competitive global market.

Computational Methods and GIS Applications in Social Science - Lab Manual Lingbo Liu

2023-10-25 This lab manual is a companion to the third edition of the textbook *Computational Methods and GIS Applications in Social Science*. It uses the open-source platform KNIME to illustrate a step-by-step implementation of each case study in the book. KNIME is a workflow-based platform supporting visual programming and multiple scripting language such as R, Python, and Java. The intuitive, structural workflow not only helps students better understand the methodology of each case study

in the book, but also enables them to easily replicate, transplant and expand the workflow for further exploration with new data or models. This lab manual could also be used as a GIS automation reference for advanced users in spatial analysis. **FEATURES** The first hands-on, open-source KNIME lab manual written in tutorial style and focused on GIS applications in social science Includes 22 case studies from the United States and China that parallel the methods developed in the textbook Provides clear step-by-step explanations on how to use the open-source platform KNIME to understand basic and advanced analytical methods through real-life case studies Enables readers to easily replicate and expand their work with new data and models A valuable guide for students and practitioners worldwide engaged in efforts to develop GIS automation in spatial analysis This lab manual is intended for upper-level undergraduate and graduate students taking courses in quantitative geography, spatial analysis, GIS applications in socioeconomic studies, GIS applications in business, and location theory, as well as researchers in the similar fields of geography, city and regional planning, sociology, and public administration.
