Everyday Life Science Frank Schaffer Publications 1997 Students learn about important subjects by relating them to events and things that occur in their everyday lives. A wealth of interesting activities provide a detailed look into each subject. Easy-to-use activities can be completed individually at school or at home, though a few hands-on experiments require group work and data sharing. A great supplement to any existing curriculum Students learn about important science concepts by relating them to events and things

that occur in their everyday lives.

The Earth Harm J. de Blij 1995 Since the publication of the last edition of this popular book, the world's political geography has changed dramatically. The refugee population has mushroomed. Migrations relocate millions every year. Onslaughts on tropical forests continue and overexploitation threatens maritime resources. This edition has been completely revised to reflect these transformations. The geography dimension has been strengthened through the expansion of material on Earth origins, crustal evolution and erosional processes. Increased attention is given to such topics as climate change, weather extremes, biogeography and resource questions. The second half has been recast, notably in the urban, economic and political chapters. The cartography is totally new and photographs are drawn from the author's field collection. This text includes full-color art and design and is organized into 30 brief eight-to-ten page chapters.

Southern African Landscapes and Environmental Change Peter J. Holmes 2018-07-04 This volume provides a textbook and reference work on the physical and biotic landscapes of Southern Africa. It examines the links between these environments and the ways in which they have been, are and will likely be subject to change. It covers the geomorphology, soils, vegetation and land use across a range of landscapes, including mountains, coasts, savannah, drylands and wetlands, and identifies the impacts of current and potential climate change and other factors on these environments. The geographical focus is on the region defined by Namibia, South Africa, Botswana, Mozambique, Zimbabwe, Lesotho and Swaziland. Illustrated throughout in full colour, the book will serve as a reference volume for researchers and environmental professionals internationally, as well as a textbook for senior undergraduate and graduate-level students of geography, ecology and environmental studies in Southern Africa.

Living in the Environment George Tyler Miller 1996

Holt Science and Technology Holt Rinehart & Winston 2001

Essentials of Ecology George Tyler Miller 2004 ESSENTIALS OF ECOLOGY, Second Edition is the ideal alternative to other ecology texts, which tend to be too difficult for non-majors. It is a succinct 12-chapter introduction, using clear, straightforward language and providing the scientific foundation necessary to understand ecological issues. ESSENTIALS OF ECOLOGY features the accuracy, balance, and current coverage that have made Miller's texts best-sellers. In fact, Miller's books are used more often at colleges across the country and around the world than any other environmental science texts! Based on Miller's LIVING IN THE ENVIRONMENT, THIRTEENTH EDITION, this text is designed to be flexible and adaptable for almost any instructional approach. With fair and balanced coverage and Internet tools integrated throughout, the book features an extensively developed art program and the most current coverage of ecology available. For the first time ever, students will automatically receive a free CD-ROM entitled "Interactive Concepts in Environmental Science" with ESSENTIALS OF ECOLOGY, Second Edition. This groundbreaking addition integrates nearly 100 engaging animations and interactions with chapter summaries, flashcards, and Web-based quizzes. Organized by chapter, the CD-ROM provides students with links to relevant resources, narrated animations, interactive figures, and prompts to review material and test themselves. The animations show complex processes and relationships unfolding on screen, such as smog formation, the phosphorus cycle, and the effects of acid rain. For this edition, Miller has added an on-line Web-based resource, entitled the Resource Integration Guide, which is updated quarterly with CNN Today video clips, animations, and articles from Thomson Learning InfoTrac College Edition service. Instructors will be able to seamlessly incorporate the most current news articles and research findings to support classroom instruction and text presentations.

Paleoclimatology Raymond S. Bradley 2013-12-28 Paleoclimatology: Reconstructing Climates of the Quaternary, Third Edition—winner of a 2015 Textbook Excellence Award (Texty) from The Text and

Academic Authors Association—provides a thorough overview of the methods of paleoclimatic reconstruction and of the historical changes in climate during the past three million years. This thoroughly updated and revised edition systematically examines each type of proxy and elucidates the major attributes and the limitations of each. CIGOS 2021, Emerging Technologies and Applications for Green Infrastructure Cuong Ha-Minh 2021-10-28 This book highlights the key role of green infrastructure (GI) in providing natural and ecosystem solutions, helping alleviate many of the environmental, social, and economic problems caused by rapid urbanization. The book gathers the emerging technologies and applications in various disciplines involving geotechnics, civil engineering, and structures, which are presented in numerous high-quality papers by worldwide researchers, practitioners, policymakers, and entrepreneurs at the 6th CIGOS event, 2021. Moreover, by sharing knowledge and experiences around emerging GI technologies and policy issues, the book aims at encouraging adoption of GI technologies as well as building capacity for implementing GI practices at all scales. This book is useful for researchers and professionals in designing, building, and managing sustainable buildings and infrastructure.

Physical Geography of the Global Environment Harm J. De Blij 1998 This text addresses critical environmental and natural issues against a background of the environmental working of our planet. Throughout, the authors' effective writing style and presentation of material capitalize on the theme of the interaction of humans in the environment. This Special Hazards Edition features Earth Magazine articles comprising six case studies of high profile, high interest hazards, including earthquakes, volcanoes, tornadoes, hurricanes and El Nino.

Disciplinary and Content Literacy for Today's Adolescents, Sixth Edition William G. Brozo 2017-04-25 Well established as a clear, comprehensive course text in five prior editions, this book has now been extensively revised, with a focus on disciplinary literacy. It offers a research-based framework for helping students in grades 6-12 learn to read, write, and communicate academic content and to develop the unique literacy, language, and problem-solving skills required by the different disciplines. In an engaging, conversational style, William G. Brozo presents effective instruction and assessment practices, illustrated with extended case studies and sample forms. Special attention is given to adaptations to support diverse populations, including English language learners. (Prior edition title: Content Literacy for Today's Adolescents, Fifth Edition.) New to This Edition: *Shift in focus to disciplinary literacy as well as general content-area learning. *Chapter on culturally and linguistically diverse learners. *Incorporates a decade of research and the goals of the Common Core State Standards. *Increased attention to academic vocabulary, English language learners, the use of technology, and multiple text sources, such as graphic novels and digital texts. *Pedagogical features: chapter-opening questions plus new case studies, classroom dialogues, practical examples, sample forms, and more.
