Respiratory Therapist Review Guide is a comprehensive study guide for respiratory therapy students and graduates of accredited respiratory therapy education programs who are seeking to take the entry-level Certified Respiratory Therapist (CRT) credentialing exam from the National Board for Respiratory Care (NBRC). This unique review guide devotes extensive coverage to two problematic areas for credentialing exam candidates, which are not covered in any of the other texts: 1). test-taking skills, and 2). key points to remember in taking the NBRC computerized exams. Special emphasis is also given to material and subject areas which have proven to be especially challenging for exam candidates (such as basic pulmonary function testing, arterial blood gas [ABGs] interpretation, monitoring critically ill [ICU] patients, neonatal and pediatric care, recommending modifications to

therapy, and more). Certified Respiratory Therapist Review Guide is authored by experts who take the credentialing exam annually, so you can be sure the content and format of this guide is current!

Study Guide to Accompany Nutrition, Concepts and Controversies Agnes Hartnell 1985 Abstract: Important nutrition facts and principles presented in a comprehensive text on current nutrition concepts and controversies are emphasized in this accompanying study guide. For each chapter, the study guide includes an overview, list of objectives, outline and key terms (with space for reading and lecture notes), definitions, and chapter review questions (i.e. short answer, matching, multiple choice) and answer key. Chapter topics include 1) an overview of the human body, 2) the problem of food choices, 3) nutrient needs and nutrition surveys, 4) energy balance, overweight, and underweight, 5) food composition and safety, and 6) measures for improving one's diet. The following nutrients are examined in detail: carbohydrates (sugar, starch, fiber), lipids, proteins, vitamins, minerals, and water. Nutrient requirements

throughout the life cycle (i.e. pregnancy, infancy, childhood, adolescence, adulthood) are also reviewed. Supplementary topics include the role of doctors in nutrition, the appropriateness of dietary guidelines, nutrition and acne, and nutrition and cancer. Appendices list reliable and unreliable sources of nutrition information and present a series of self-study exercises and accompanying forms for evaluating individual dietary and exercise habits.
