Apr 22, 2026 · Convection, process by which heat is transferred by movement of a heated fluid such as air or water. Natural convection results from the tendency of most fluids to expand when heated—i.e., ... Heat transfer between a solid and a moving fluid is called convection. This is a short tutorial about convective heat transfer. Convection is a way for heat to move, also referred to as a heat transfer mechanism. This transfer of heat happens when a fluid such as air or water is in motion. Convection is driven by temperature ... Nov 2, 2024 · What Is Convection? Convection is the process of heat transfer within a fluid due to the movement of the fluid itself. When a part of the fluid becomes warmer, it typically becomes less ... Convection is the transfer of internal energy into or out of an object by the physical movement of a surrounding fluid that transfers the internal energy along with its mass. Convection is heat transfer by the macroscopic movement of mass. Convection can be natural or forced and generally transfers thermal energy faster than conduction. Convection, especially Rayleigh-Bénard convection, where the convecting fluid is contained by two rigid horizontal plates, is a convenient example of a pattern-forming system.
