

Basic Shapes In Ms Word Triangular Prism

Cut and Paste Math Jodene Smith 2003-05-21 Each book in this series provides a variety of motivating, interactive activities to help young students master concepts and content. The "cut and paste" format allows students to try a variety of possibilities before gluing down their final answers.

Mathematics for Every Student Dorothy Y. White 2009 Demonstrates how connecting real-life activities with mathematical concepts, and building on students' knowledge and experiences, can help them excel in the classroom. Strategies that can immediately be implemented to help students form better connections with the content they are studying are also described. --from publisher description.

Spiritual Calculations Christine Cooper-Rompato 2022-01-21
Medieval English sermons
teem with examples of quantitative reasoning, ranging from the arithmetical to the numerological, and regularly

engage with numerical concepts. Examining sermons written in Middle English and Latin, this book reveals that popular English-speaking audiences were encouraged to engage in a wide range of numerate operations in their daily religious practices. Medieval sermonists promoted numeracy as a way for audiences to appreciate divine truth. Their sermons educated audiences in a hybrid form of numerate practice—one that relied on individuals' pragmatic quantitative reasoning, which, when combined with spiritual interpretations of numbers provided by the preacher, created a deep and rich sense in which number was the best way to approach the sacred mysteries of the world as well as to learn how one could best live as a Christian. Analyzing both published and previously unpublished sermons and sermon cycles, Christine Cooper-Rompato explores the use of numbers, arithmetic, and other mathematical operations to better understand how medieval

laypeople used math as a means to connect with God. *Spiritual Calculations* enhances our understanding of medieval sermons and sheds new light on how receptive audiences were to this sophisticated rhetorical form. It will be welcomed by scholars of Middle English literature, medieval sermon studies, religious experience, and the history of mathematics.
