Handbook of Implementation Science for Psychology in Education Barbara Kelly 2012-08-20 This book aims to help policy makers, stakeholders, practitioners, and teachers in psychology and education provide more effective interventions in educational contexts. It responds to disappointment and global concern about the failure to implement psychological and other interventions successfully in real-world contexts. Often interventions, carefully designed and trialed under controlled conditions, prove unpredictable or ineffective in uncontrolled, real-life situations. This book looks at why this is the case and pulls together evidence from a range of sources to create original frameworks and guidelines for effective implementation of interventions.  
The Prose Reader Kim Flachmann 1993 The

Prose Reader promotes the skills of thinking, reading, and writing, enabling the user to think more clearly and logically--both in his/her mind and on paper. Prose models are intended to inspire, encouraging improved writing with a partnership with some of the best examples of professional prose available today. Each chapter begins with an explanation of a single technique, with essays that follow each chapter introduction selected from a wide variety of well-known contemporary authors. It helps readers discover various ways of thinking about and analyzing the essay. The book progresses from selections that require literal skills (Description, Narration, and Example) through readings involving more interpretation (Process Analysis, Division/Classification, Comparison/Contrast, and Definition) to essays that demand a high degree of analytical thought (Cause/Effect and Argument/Persuasion). An excellent and demanding reader for anyone interested in building their reading, writing, and thinking

skills.

Reading and Writing for Civic Literacy Donald Lazere 2017-07-05 'Lazere's [book] is heaven-sent and will provide a crucial link in the chain of understanding how conflicts are structured and, most importantly, how they can be rationally addressed - a healthy antidote to the scepticism that has become so pervasive in academic life.' Alan Hausman, Hunter College This innovative book addresses the need for college students to develop critical reading, writing, and thinking skills for self-defence in the contentious arena of American civic rhetoric. In a groundbreaking reconception of composition theory, it presents a comprehensive critical perspective on American public discourse and practical methods for its analysis. Exercises following the text sections and readings help students understand the

ideological positions and rhetorical patterns that underlie opposing viewpoints in current controversies - such as the growing inequality of wealth in America and its impact on the finances of college students - as expressed in paired sets of readings from the political left and right. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

Sunday O. Anozie 2016-08-19 In this pioneering work, first published in 1981, Sunday O. Anozie examines the relevance of structuralism and semiology to literary criticism in general and to African poetics in particular. Behind the growing body of African literature lies an immense reservoir of oral tradition for which the proper tools of analysis and interpretation have yet to be found. This book represents the first comprehensive full-scale exposition, analysis and critique of structuralism by a non-Western and non-European scholar. From an African viewpoint, it examines the roles to be played by structuralism and post-structuralism in the development of the general principles governing poetics and literary creativity in Africa. This title will be of interest to students of literature and literary theory.
