*ADePT User Guide* Michael Lokshin "ADePT software enables users to analyze microdata—from sources such as household surveys—and generate print-ready, standardized tables and charts. It can also be used to simulate the impact of economic shocks, farm subsidies, cash transfers and other policy instruments on poverty, inequality and labor. The software automates the analysis, helps minimize human errors and encourages development of new economic analysis methods. ADePT supports datasets in Stata®, SPSS® and tab-delimited text formats. ADePT incorporates Numerics by Stata® (installed with ADePT) as its computational engine. For each run, ADePT produces one output file—containing your selection of tables and graphs, an optional original data summary, and errors and notifications—in Microsoft® Excel® format. Optionally, tables of standard errors and frequencies can be added to a report."
