Implementing NCLB Paul Kimmelman 2006-03-23 "Implementing NCLB is an important guide to thinking about how to create the infrastructure to support sustained school improvement. Kimmelman's extensive experience as an educator coupled with his understanding of policymaking and research allow him to transcend the silos that too often constrain thinking about these issues." -Andrew J. Rotherham, Co-Director, Education Sector, Senior Fellow Progressive Policy Institute Member, Virginia Board of Education "This inspirational book provides a convincing and compelling call to action. Kimmelman provides plenty of practical examples and moves easily between specific applications and the big picture." -Michael Fullan, Professor OISE, University of Toronto "I believe this book should be read by every administrator and teacher leader. It provides a framework for schools to address the need for continuous school improvement in order to meet the expectations of NCLB." -Theron J. Schutte, Superintendent, Boone Community School District, IA How can NCLB directives be successfully applied to school improvement efforts? Meeting the requirements of NCLB is a monumental task. In a concise, straightforward manner, author Paul L. Kimmelman shows readers how to overcome this challenge by building organizational capacity through a knowledge model. This model provides a simple but effective framework for evidence-based continuous improvement that complies with the fundamental underpinnings of NCLB. Key features include: A context-setting overview of the politics and education initiatives that led to NCLB An analysis of what educational leadership means in an age of accountability Lessons in leadership from educators, scientists, explorers, and entrepreneurs Practical examples, reflective questions, and action ideas to help link concepts to specific applications Recommended resources, publications, and products to help build organizational capacity Intended for educators and administrators who have an active role in leading their school or district improvement activities, this book will also be an essential resource for focusing the efforts of school improvement and learning teams.

Getting to Excellence James A Johnson, Jr PhD 2013-03 This book is about a journey with the Center for Strategic Alliances in Education for School and District Improvement with stakeholders in a school targeted for school improvement. The first chapter puts into context the notion of school, its purpose and the incumbent variables of values, attitudes, organizational and leadership behaviors and instructional practices. Throughout the book, the authors look at three contextual boundaries: (1) historical, (2) the lens of former students and their perceptions of the presence or absence of those variables and (3) a comparison of labeled schools and the views and perceptions of stakeholders with regard to quality, equity and adequacy. This is a compelling journey which utilizes quantitative and qualitative data to take a critical look at the processes involved and the strategies used in America's journey in the quest for excellence. The authors' story is one of the pursuits of innovation, reinvention, equity, excellence and culturally relevant education experiences that inspire and reframe the discussion about "getting to excellence". The book is replete with illustrations of weaknesses hidden in abstract policies, institutional persistence, and culturally void programs, methodologies and practices. It advocates a methodology for arriving at well-conceived processes for achieving acceptance and academic excellence through collaboration among those to whom education is important - the children and the communities where they live.

Steele 2024-07-30 Foster a love of mathematics by creating a more inclusive and empowering learning environment through asset-based teaching!
