Development and Delivery of Research Implementation

Workshops in Transportation Operations and Management Gary Brian Thomas 2005 Bridging the gap between state-of-the-art and state-of-the-practice is vital to improving the safety and efficiency of our streets and highways. The goal of this project was to present practitioners with the latest tools and innovations in transportation engineering through interactive adult-learner-oriented workshops. The topics of the workshops focused on traffic operations research projects recently completed at the Texas Transportation Institute. In all, nine workshops were developed and taught 39 times to approximately 700 participants.

Database Systems Management and Design Philip J. Pratt 1994 This volume is designed for a short course in information systems, data processing, or computer science. The emphasis of the text is on applications and it should be useful for those who will be involved in database management in business and industry. Emphasis on the relational model (the basis for the leading database management systems) provides students with knowledge of databases used in industry. Full treatment of microcomputer database environments, including Windows and DOS database management systems, as well as fourth-generation software tools is given.

The Workshop Reader which contains the reports from the workshops has beenasubstantialpartoftheECOOPconferenceformorethan10years.During the pre-conference phase the workshop organizers are invited to author a report about their workshops where they have the opportunity to describe the state of the art,the discussionsandthe trends inthe ?elds oftheirworkshop.Inaddition some of the organizational aspects may be discussed. This volume collects 19 reports from high-quality workshops whose topics were related to selected aspects in the ?eld of object-oriented programming and technology. Following the example of previous workshop readers we introduced some notions in order to establish thematic clusters. These notions are (1) P- gramming Languages, (2) Aspects, (3) Formal Techniques, Roles, Components, (4) Software Engineering, and (5) Applications. Three months after the conference we are now able to present the reports which describe the state of the art, the discussions and the relevant trends in the research ?elds addressed by the workshops. In sum, each of these reports thus contributes to a panoptic overview of the current tendencies in the lively ?eld of object-oriented programming and technology. Readers from academia and industry who want to be informed about the current developments in this research area thus can highly pro?t from this volume.
