**Addison-Wesley Chemistry** 1990

**Holt Chemistry** Ralph Thomas Myers 2004

*The Practice of Chemistry* Donald J. Wink 2003-03 Students can't do chemistry if they can't do the math. The Practice of Chemistry, First Edition is the only preparatory chemistry text to offer students targeted consistent mathematical support to make sure they understand how to use math (especially algebra) in chemical problem solving. The book's unique focus on actual chemical practice, extensive study tools, and integrated media, makes The Practice of Chemistry the most effective way to prepare students for the standard general chemistry course--and bright futures as science majors. This special PowerPoint® tour of the text was created by Don

*Chemistry, Student Study Guide* James E. Brady 2008-01-28 The image on the front cover depicts a carbon nanotube emerging from a glowing plasma of hydrogen and carbon, as it forms around particles of a metal catalyst. Carbon nanotubes are a recently discovered allotrope of carbon. Three other allotropes of carbon-buckyballs, graphite, and diamond-are illustrated at the left, as is the molecule methane, CH<sub>4</sub>, from which nanotubes and buckyballs can be made. The element carbon forms an amazing number of compounds with structures that follow from simple methane, found in natural gas, to the complex macromolecules that serve as the basis of life on our planet. The study of chemistry also follows from the simple to the more complex, and the strength of this text is that it enables students with varied backgrounds to proceed together to significant levels of achievement.

**Chemistry, Student Study Guide** John A. Olmsted 2002-01-04 This third edition continues to innovate by providing students with an integrated and modern approach to the subject. The text emphasizes the modern tools of chemistry while incorporating historical evidence, and its unique molecular/quantitative emphasis is further reinforced by an integrated media package developed by the authors. Also of benefit is the just-in-time presentation of key content - only providing details once they are needed. While key topics and analytical techniques have been updated, there is now an additional, third chapter on chemical equilibrium. The authors have also developed an expanded and more integrated problem-solving emphasis that now incorporates a 4-step strategy throughout, complete with text icons. The whole is backed by a range of supplements, including a new illustration program, a tutorial CD, interactive learningware, an extensive Web CT component, an instructor's resource CD, and a solution CD.

**Chemistry** James C. Hill 2003 This book assists students through the text material with chapter overviews, learning objectives, review of key terms, cumulative chapter review quizzes and self-tests. Included are answers to all Student Guide exercises. Chapter summaries are correlated to those in the Instructor's Resource Manual.

*Chemistry* DonnaJean Fredeen 1998 For each chapter, the study guide includes learning goals, an overview, progressive review section, worked examples, and self-tests with answers.

**Chemistry Homework** Frank Schaffer Publications 1996-03 Includes the periodic table, writing formulas, balancing equations, stoichiometry problems, and more.

*Stoichiometry Unit Project* Luann Marie Decker 1998

*Chemistry* John Christian Bailar 1984

*Chemistry* Neil D. Jespersen 2022-08-23 *Chemistry: The Molecular Nature of Matter*, International Adaptation continues to emphasize the importance of applying concepts to problem-solving to achieve high-level learning and increase retention of chemistry knowledge. The inclusion of more, and updated, real-world examples provide students with a significant relationship of their experiences with the science of chemistry. Additionally, end-of-chapter review questions integrating scientific practices, cross-cutting concepts, and chemistry core ideas to relate the ideas presented in each chapter to the wider fields of science

have been updated to align them with career concepts relevant to the environment, engineering, biological, pharmaceutical, and medical sciences. Problems have been arranged in a confidence-building order. *Elements of Physical Chemistry* J. William Moncrief 1977

**Chemistry** McMurry 2003-07

**Kaplan SAT: Chemistry** Claire Aldridge 2006-02 Includes: \*3 Full-length practice tests \*Comprehensive review of all the tested material with practice quizzes for each chapter \*Effective strategies to maximize your score
