Finding List of the Chicago Public Library Chicago Public Library 1884

Handbook on Geographic Information Systems and Digital Mapping 2000 The rapid recent developments in digital mapping technology and the increasing demand for geo-referenced small area population data have been the main motivation for the present handbook. The Handbook provides guidance on how to ensure consistency and facilitate census operations; support data collection and help monitor census activities during enumeration; and facilitate presentation, analysis and dissemination of census results. Along with an overview of geographic information systems and digital mapping, the publication discusses cost-benefit analysis of an investment in digital cartography and geographical information systems (GIS); the

use of GIS during census enumeration; and describes the role of GIS and digital mapping in the post-censal phase [from UN website].

Africa John McIlwaine 2007 First published in 1993, this is a new revised and substantially expanded edition of a highly acclaimed reference resource that evaluates the leading sources of information (other than bibliographies) on Africa South of the Sahara.

Bowker's Best Reference Books: Author index. Title index 2005 Contains approximately 20,000 mostly English language sources for academic libraries of all sizes.

The New Walford Guide to Reference Resources Ray Lester 2005 The New Walford highlights the best resources to use when undertaking a search for accurate and relevant information, saving you precious time and effort. For those looking for a selective and evaluative reference resource that really delivers on its promise, look no further. In addition to print sources, The New Walford naturally covers an extensive range of e-reference sources such as digital databanks, digital reference services, electronic journal collections, meta-search engines, networked information services, open archives, resource discovery services and websites of premier organizations in both the public and private sectors. But rather than supplying a list of all available known resources as a web search engine might, The New Walford subject specialists have carefully selected and

evaluated available resources to provide a definitive list of the most appropriate and useful. With an emphasis on quality and sustainability, the subject specialists have been careful to assess the differing ways that information is framed and communicated in different subject areas. As a result the resource evaluations in each subject area are prefaced by an introductory overview of the structure of the relevant literature. This ensures that The New Walford is clear, easy-to-use and intuitive. - Publisher.
