Unsettled Issues Facing Automated Vehicles and Insurance Ian Williams 2020-08-05 This SAE EDGE™ Research Report explores how the deployment of automated vehicles (AVs) will affect the insurance industry and the principles of liability that underly the structure of insurance in the US. As we trade human drivers for suites of sensors and computers, who (or what) is responsible when there is a crash? The owner of the vehicle? The automaker that built

it? The programmer that wrote the code? Insurers have over 100 years of experience and data covering human drivers, but with only a few years' worth of information on AVs - how can they properly predict the true risks associated with their deployment? Without an understanding of the nature and risks of AVs, how can the government agencies that regulate the insurance industry provide proper oversight? Do the challenges AVs present require a total reworking of our insurance and liability systems, or can our current structures be adapted to fit them with minor modifications? *Unsettled Legal Issues Facing Automated Vehicles* explores a number of potential challenges and unsettled topics facing the insurance industry and offers potential solutions brought forth from a team of seven legal experts. A Teen Guide to Protecting and Insuring Assets

Tammy Gagne 2014-04 Maybe you just started building your assets, or perhaps you already have many valuable items, such as collections or jewelry. Either way, it is important to protect your belongings. From beloved childhood treasures like baseball cards and comic books to big-ticket items like musical instruments and automobiles, replacing your assets can be very expensive. Having insurance will help lessen your financial loss if your possessions are damaged, lost, or stolen. But buying a policy can be confusing and complicated. This book will answer many common questions about insurance⁸²¹²; and how to minimize the chances you will need to use that insurance in the first place.
