Techniques to develop the essential critical reasoning skills

Bookwise Sharon Parsons 2002 Bookwise is a carefully graded reading scheme organized into five cross-curricular strands, encouraging links to other subjects. Comprising 16 fiction and ten non-fiction titles, the 25 books at each level span a two-year reading age and the three-tier levelling system within each level facilitates an accurate match of reading ability and text. The full-colour readers are accompanied by teacher's guides and resource sheets to help teachers get the most out of their guided reading and writing sessions.

Child Development Gail S. Ditkoff 1998-09 Appealing to the many different backgrounds and career goals of individuals interested in child development, this book offers the most current, balanced coverage of theory and research with a focus on the application of that research woven into a rich chronological presentation filled with useful learning tools.

Feldman's unique approach illustrates the scope and diversity of the field of child and adolescent psychology and capitalizes on readers' inherent interest in the subject by asking them to relate what they are learning to their own experience as developing humans. A lively conversational writing style exists among the many chapter topics including behavioral genetics, ethnography, brain development, cultural differences in autobiographical memories, emotional intelligence, emotional regulation and relational aggression, home schooling, teenage stress, alcohol consumption, use of Prozac and childhood depression, adolescent Web surfing, and the downside of self-esteem. For individuals with careers and an interest in the field of child development.
