**Child Development in Educational Settings** Marilyn Fler 2018-01-26 Child Development in Educational Settings provides a comprehensive introduction to traditional and contemporary theories of development and learning in the contexts of early childhood and primary education. Drawing upon the experiences and perspectives of children, families, educators and Aboriginal and Torres Strait Islander scholars, Marilyn Fler provides insights into significant theories and approaches, including cultural-historical, constructivist, social constructivist, maturational and ecological systems. The book features four major case studies, which are revisited throughout, to examine how learning and development can be re-imagined within socially, culturally and linguistically diverse communities. This approach enables readers to use theories to analyse and measure learning and development in planning and curriculum, and to feel empowered to enact change in their educational settings. Written in an engaging and accessible style, Child Development in Educational Settings is an essential resource for pre-service teachers and professionals alike.

**Observation and Participation in Early Childhood Settings** Jean Billman 2003 This text was written to give students experience in using effective methods for observing young children's development (ages 0-8) and documenting their observations. Designed to guide students' participation with children of different age groups in a variety of early childhood settings, the text encourages students to interact with children as they learn more about development by carrying out the activities outlined in each chapter. This text models the educational approaches that professionals advocate for early childhood classrooms: observational learning, active learning, guided discovery, choice, mini-lessons and cooperative learning. These approaches are incorporated into this text through concise overviews and numerous activities related to early childhood development and education.

Using Observation in Early Childhood Education Marian Marion 2003 Written by a prolific, well-respected author, this book teaches how to observe, document, and assess children's development and progress--emphasizing how powerful ethical, responsible observation can be in a teacher's professional life. Focusing on observations as an intrinsic part of authentic assessment, the author advocates a protective, respectful attitude toward it. Provides an overview of various informal and formal observation and assessment strategies, as well as instruction in how to embed observation into the daily routine of the early childhood classroom. Explores ways to prevent problems, ways to solve problems, and ways to work cooperatively with parents. Included is coverage of the ethics of observation and the pros and cons of standardized testing as it relates to observation and assessment. For early childhood teachers.
