Exploring Physical Anthropology Laboratory

Manual & Workbook Suzanne E. Walker-Pacheco 2017-02-01 Exploring Physical Anthropology is a comprehensive, full-color lab manual intended for an introductory laboratory course in physical anthropology. It can also serve as a supplementary workbook for a lecture class, particularly in the absence of a laboratory offering. This laboratory manual enables a hands-on approach to learning about the evolutionary processes that resulted in humans through the use of numerous examples and exercises. It offers a solid grounding in the main areas of an introductory physical anthropology lab course: genetics, evolutionary forces, human osteology, forensic anthropology, comparative/functional skeletal anatomy,

primate behavior, paleoanthropology, and modern human biological variation.

Critical Sustainability Sciences Stephan Rist

2023-08-02 This book explores Critical Sustainability Sciences, a new field of scientific inquiry into sustainability issues. It builds on a highly novel integration of elements from relational ontologies, critical theory, political ecology, and intercultural philosophy in support of emancipatory perspectives on sustainability and development. The book begins by uncovering the weaknesses of mainstream sustainability science and debates on sustainable development. The new field of Critical Sustainability Sciences has grown out of a deep engagement with relational ontologies, which helps to overcome the dualist ontology underlying mainstream notions of sustainability

and development. Dualist ontologies reinforce problematic anthropocentric divisions, for example, between humans and nature, subjects and objects, mind and matter, body and soul, etc. Examples from indigenous peoples in Bolivia, India, and Ghana – as well as integrative movements in Chile, Brazil, and Europe – show that relational conceptions of life, rooted in ecosophy and cosmosophy, can provide an intercultural philosophical foundation for Critical Sustainability Sciences. The book concludes by describing three key topics for exploration in Critical Sustainability Sciences: societal reorganization in view of emancipatory, existential, and cognitive self-determination; living labor and commons; and the development of new comprehensive relational scientific paradigms. This book will be of great interest to students, scholars, and practitioners of emancipatory and intercultural approaches to sustainability and development.

Generative AI in Modern Healthcare Rohit

Vashisht, Sapna Juneja, Sandeep Kautish
2026-04-01 *Generative AI in Modern Healthcare* brings together research and practical insights on how technologies like machine learning, deep learning, generative AI, and federated learning are transforming healthcare. It explains how these tools are improving diagnosis, treatment planning, and patient care. The book covers key areas such as personalised medicine, predictive analytics, telemedicine, and AI-based healthcare systems. It also highlights the growing role of AI in medical imaging and diagnostics across fields like radiology, pathology, and cardiology. In addition, the book explores how AI supports drug discovery, disease prediction, and clinical decision-making, using real-world examples and datasets. It also discusses key challenges, including data quality, bias, privacy, and ethical concerns, as well as secure approaches such as federated learning. Overall, the book provides a clear understanding of how AI is shaping modern healthcare and improving outcomes. Key

Investigating Biology Judith Giles Morgan 1999 An undergraduate lab manual containing 27 lab exercises designed to encourage students to ask questions, pose hypotheses, and make predications before they begin lab work. Students are required to synthesize results from observations and experiments, draw conclusions, apply results to new problems, and to design their own investigations. Scientific writing is emphasized throughout. Includes appendices on scientific writing, chi-square test, and terminology and techniques for dissection, as well as a section of color photos. This edition

contains a new lab on cellular respiration, and several labs are modified based on new evidence in molecular biology. Wire spiral binding. Annotation copyrighted by Book News, Inc., Portland, OR

Order & Diversity in the Living World Jorge Víctor Crisci 1993 Includes sample instructional activities for ages 6-18.

Proceedings of Data Analytics and Management Abhishek Swaroop 2025-10-28 This book includes original unpublished contributions presented at the International Conference on Data Analytics and Management (ICDAM 2025), held at London Metropolitan University, London, UK, during June 2025. The book covers the topics in data analytics, data management, big data, computational intelligence, and communication networks. The book presents innovative work by leading academics, researchers, and experts from industry which is useful for young researchers and students. The book is divided into ten volumes.
