What Is a Criminal?

Katherine S. Gaudet
2022-12-30 Bringing together a collection of essays by writers with diverse knowledge of the US criminal justice system, from those with personal experience in prison and on patrol to scholarly researchers, *What Is a Criminal?* explores the category of "criminal" through the human stories of those who bear and administer that label. This book performs a rare feat in bringing together the perspectives of justice-impacted people, those who work in law enforcement and social services, and scholarly researchers. Each chapter is a compelling narrative sharing the experience and perspective of a unique person with knowledge of the justice system. The first section,

"Incarceration, Reentry, and Rebuilding," gives a glimpse into the "black box" of prison, with firsthand accounts of daily life on the inside and the struggle to begin a new life after prison. Section 2, "Journeys in Law Enforcement," presents perspectives from police officers, school resource officers, and corrections officers who are working to better their communities. The third section, "Ripple Effects," addresses some of the broader impacts of the justice system, showing what it is like to be the child of an incarcerated parent, to be profiled, to be an undocumented immigrant, and to make art about the justice system. The final section, "Scholarly Perspectives," is comprised of accessible articles by academics who study law and crime. Each chapter stands alone as an individual story, but taken

together they provide a uniquely nuanced view of the US justice system. This book will be of interest to anyone who wants to know more about criminality, the US justice system, and the people involved in it. It is designed for a general audience, with accessible, compelling stories that will appeal to a variety of readers. It is an effective text for college and high school courses about crime and criminality, and provides excellent fodder for discussion in law enforcement and social services training programs or professional development workshops.

Teaching Science Online
Dietmar Kennepohl 2023-07-03
With the increasing focus on science education, growing attention is being paid to how science is taught. Educators in science and science-related disciplines are recognizing that

distance delivery opens up new opportunities for delivering information, providing interactivity, collaborative opportunities and feedback, as well as for increasing access for students. This book presents the guidance of expert science educators from the US and from around the globe. They describe key concepts, delivery modes and emerging technologies, and offer models of practice. The book places particular emphasis on experimentation, lab and field work as they are fundamentally part of the education in most scientific disciplines. Chapters include:* Discipline methodology and teaching strategies in the specific areas of physics, biology, chemistry and earth sciences.* An overview of the important and appropriate learning technologies (ICTs) for each major science.* Best practices for establishing and maintaining a successful course online.* Insights and tips for handling practical components like laboratories and field work.* Coverage of

breaking topics, including MOOCs, learning analytics, open educational resources and m-learning.* Strategies for engaging your students online. LAZSTA Earth & Environmental Science Practice Papers Cherine Spirou 2023

Holt Environmental Science

Staff 1996-01 Our environmental problems are huge, and they require careful attention and action. The twenty-first century will be a crucial time in human history, a time when we must find solutions that allow people on all parts of our planet to live in a clean, healthy environment and have the resources they need for a good life. - p. 5.

Cengage Advantage Books: Sustaining the Earth: An Integrated Approach G. Miller 2006-09-19 G. Tyler Miller's worldwide bestsellers have evolved right along with the changing needs of your diverse student population. Focused specifically on energizing and engaging all your students, Miller and new

contributor Scott Spoolman have been at work scrutinizing every line--enhancing, clarifying, and streamlining to reduce word density as well as updating with the very latest environmental news and research. The resulting texts are shorter, clearer, and so engaging that your students will actually want to read their assignments. About half the price of other environmental science texts, this 14-chapter, one-color core text offers an integrated approach that emphasizes how environmental and resource problems and solutions are related. New to this edition for instructors is PowerLecture, a one-stop shop for lecture prep that includes everything you need to create dynamic lectures all in one place.
