China Satellite Navigation Conference (CSNC) 2017 Proceedings: Volume III
Jiadong Sun 2017-05-02 These proceedings present selected research papers from CSNC2017, held during 23th-25th May in Shanghai, China. The theme of CSNC2017 is Positioning, Connecting All. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS), and the latest progress made in the China BeiDou System (BDS) especially. They are divided into 12 topics to match the corresponding sessions in CSNC2017, which broadly covered key topics in GNSS. Readers can learn about the BDS and keep abreast of the latest advances in GNSS techniques and applications.

Centrifugal Compressors in Hydrocarbon Processing Industries Neetin Ghaisas
2025-11-07 This book offers a unique perspective on the aerodynamic and mechanical design features of centrifugal compressors. It provides detailed explanations of auxiliary systems to support engineering professionals involved in the specification, application, and selection of compression strings and packages. The book covers the fundamentals of centrifugal compressor casing and internal

design, complemented by in-depth analysis of impellers and rotors. Chapters on surge detection and control, couplings, dry gas seals and their support systems, and lubrication oil systems provide a comprehensive understanding of the underlying theory, operational principles, and design processes. Topics such as lateral rotordynamics, advanced torsional analysis, shop testing, specialized engineering analyses, and condition monitoring address key knowledge-based engineering parameters. These are essential for achieving industry-standard-compliant designs, optimal performance, safety, and long-term reliability in service. In addition to discussing conventional concrete foundations, the chapter on machinery modularization introduces innovative installation strategies. These include shifting significant portions of site work to module yards, reducing material movement at job sites, and lowering costs

associated with construction and pre-commissioning activities. Machinery and process modules contribute to optimized plot layouts, ultimately reducing the total installed cost of process plant facilities. Comprehensive and detailed technical specifications for inquiries and purchases aim to eliminate guesswork, misinterpretation, and scope gaps. Errors or omissions in purchase orders can be costly and difficult to rectify during project execution. The chapter on compressor specifications, proposal evaluation, and design coordination addresses these challenges using real-world examples. In light of global initiatives to reduce greenhouse gas emissions, a dedicated chapter explores the process of capturing and storing carbon dioxide (CO₂). It discusses the two primary compressor types used for CO₂ compression, provides an overview of sequestration processes and current challenges, and highlights new technologies that extend the

life of compressor materials. Configuration options for improved overall efficiency are also examined.

The Application of Satellite-based Internet of Things for New Mobility Paul Phillips
2024-01-09 With the increased use of devices requiring the Internet of Things (IoT) to enable “New Mobility,” the demand for satellite-enabled IoT is growing steadily, owing to the extensive coverage provided by satellites (over existing ground-based infrastructure). Satellite-based IoT provides precise and real-time vehicle location and tracking services, large-scale geographical vehicle and/or infrastructure monitoring, and increased coverage for remote locations where it may not be possible to install ground-based solutions. The Application of Satellite-based Internet of Things for New Mobility discusses satellite-based IoT topics that still need addressing, which can be broadly classified into two

areas: (1) affordable technology and (2) network connectivity and data management. While recent innovations are driving down the cost of satellite-based IoT, it remains relatively expensive, and widespread adoption is still not as high as terrestrial, ground-based systems. Security concerns over data and privacy also create significant barriers to entry and need to be addressed along with issues such as intermittent connectivity, latency and bandwidth limitations, and data storage and processing restrictions. and obesity is one of the most pressing global challenges due to its consequences for survival, long-term association with chronic diseases, as well as its impacts on economic development and productivity at the individual and societal level. Scientific evidence is needed to quantify and document the short- and long-term causes and consequences of maternal and child malnutrition, as this will help to identify, implement, and focalize effective, equitable, and culturally sensitive interventions and policies. This Research Topic will disseminate innovative research focused on the socioecological and epidemiological context of maternal and child nutrition, the impact of malnutrition on women's and children's health and developmental outcomes across their life span, and special attention on, approaches and interventions, and challenges to address these public health problems.

Springer Handbook of Geographic Information

Wolfgang Kresse 2022-06-24

This handbook provides an exhaustive, one-stop reference and a state-of-the-art description of geographic information and its use. This new, substantially updated edition presents a complete and rigorous overview of the fundamentals, methods and applications of the multidisciplinary field of geographic information systems. Designed to be a useful and readable desk reference book, but also prepared in various electronic formats, this title allows fast yet comprehensive review and easy retrieval of essential reliable key information. The Springer Handbook of Geographic Information is divided into three parts. Part A, Basics and Computer Science, provides an overview on the fundamentals, including descriptions of databases and encoding of geographic information. It also covers the underlying mathematical and

statistics methods and modeling. A new chapter exemplifies the emerging use and analysis of big data in a geographic context. Part B offers rigorous descriptions of gathering, processing and coding of geographic information in a standardized way to allow interoperable use in a variety of systems; from traditional methods such as geodesy and surveying to state-of-the-art remote sensing and photogrammetry; from cartography to geospatial web services. Discussions on geosemantic interoperability and security of open distributed geospatial information systems complete the comprehensive coverage. The final part describes a wide array of applications in science, industry and society at large, such as agriculture, defense, transportation, energy and utilities, health and human services. The part is enhanced by new chapters on smart cities and building information modeling, as well as a complete overview of the currently available open-source

geographic information systems. Using standardized international terminology, in accordance with ISO/TC 211 and INSPIRE, this handbook facilitates collaboration between different disciplines and is a must have for practitioners and new comers in industry and academia.

Nurse Anesthesia - E-Book Sass Elisha 2022-01-23 - Updated information on pharmacology includes pharmacokinetics, drug delivery systems, opiate antagonists, and key induction drugs. - Interactions with other anesthetic agents are integrated where appropriate, along with other important considerations. - Overview of basic science provides a thorough basis for understanding nurse anesthesia. - Information on Joint Commission (TJC) standards covers monitoring and administering moderate sedation/analgesia, also adding coverage of patient safety,

monitoring, and pharmacology.
- More than 800 full-color photos and illustrations depict anatomy, procedures, concepts, and equipment. - Logical organization of the text covers basic principles first, and builds on those with individual chapters for each surgical specialty. - More than 800 tables and boxes summarize essential information in a quick, easy-to-reference format. - UNIQUE! Expert CRNA authors provide the most up-to-date clinical information for CRNAs to use in daily practice. - Handy references make it quick and easy to find the latest and most important research in the field. - NEW! Updated content reflects the latest changes in the industry - NEW! Two new chapters include Crisis Resource Management and Patient Safety and Infection Control and Prevention
Spacewear Barbara Brownie
2019-01-10 Today, we are living in the New Space Age, where mass commercial space travel is almost within our grasp. This otherworldly

possibility has opened up new cultural images of space, both real and fictional, and has caused fashion design and spacesuit engineering to intersect in new, exciting ways. Spacewear traverses this uncharted territory by exploring the changing imagination of space in fashion- and fashion in space-from the first Space Age to the 21st century. Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment, Spacewear connects the catwalk and the space station. This book draws together speculative fantasies in sci-fi films such as Star Trek and 2001: A Space Odyssey, with the engineered spacesuits Biosuit, and the NASA Z-2 and with catwalk interpretations by the likes of Alexander McQueen, Hussein Chalayan, André Courrèges, and Iris van Herpen. While the development of commercial space agencies has led to new concerns for

style in garments for outer space that re-think fundamental design principles such as drupe, high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet-style headwear. Brownie takes the reader on a fascinating journey from fantasy to function and to form, deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space.

Mechanical Engineering And Control Systems - Proceedings Of 2015 International Conference (Mecs2015)

Xiaolong Li 2016-01-15 This book consists of 113 selected papers presented at the 2015 International Conference on Mechanical Engineering and Control Systems (MECS2015), which was held in Wuhan, China during January 23-25, 2015. All accepted papers have been subjected to strict peer review by two to four expert

referees, and selected based on originality, ability to test ideas and contribution to knowledge. MECS2015 focuses on eight main areas, namely, Mechanical Engineering, Automation, Computer Networks, Signal Processing, Pattern Recognition and Artificial Intelligence, Electrical Engineering, Material Engineering, and System Design. The conference provided an opportunity for researchers to exchange ideas and application experiences, and to establish business or research relations, finding global partners for future collaborations. The conference program was extremely rich, profound and featured high-impact presentations of selected papers and additional late-breaking contributions.

Future Spacecraft Propulsion Systems and Integration

discusses how to match near-term and far-term aerospace vehicles to missions and provides a comprehensive overview of the subject, directly contributing to the next-generation space infrastructure, from space tourism to space exploration. This holistic treatment defines a mission portfolio addressing near-term to long-term space transportation needs covering sub-orbital, orbital and escape flight profiles. In this context, a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access. A best-practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission. This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike.
