Authentic Assessment in Social Studies

David Sherrin 2026-05-22 Now in its second edition, this book shows you how to move beyond tests, and even essay writing, to implement authentic assessments in your middle or high school social studies classroom. Award-winning teacher David Sherrin explains the value of authentic assessments and offers practical ways to get started and dive deeper in your own practice. You'll be encouraged and inspired by the real-life stories of classroom successes and failures that illustrate the points

throughout the book. The chapters cover a range of categories, including different types of written, creative, and civic action assessments. New to the second edition: • Discussion of the concerns and current writings and understandings around artificial intelligence (A.I.) and plagiarism, especially in terms of writing • Writing strategies in the age of A.I.: In-class work and partner essays • Discussion of research papers and A.I., including the use of technology and notecards • Considerations on historical art and A.I. • An overview of how to make sure student work is their own • The importance of classroom participation in social studies This resource will help you learn how to personalize instruction and provide students with avenues for creativity and the types of learning experiences they need to be prepared

for a complex world.

Welcoming Students who are Deaf-blind Into Typical Classrooms Norris G. Haring 1995 As an

increasing number of students who are deaf-blind join their peers in typical classrooms, educators need guidance to create supportive environments that maximize students' potential for learning and personal growth. This timely book discusses in depth the rationale for including students who are deaf-blind in typical classrooms and explores the issues that surround such important areas as behavior, mobility, communication, and transition to adult life. In addition to offering sound advice on how to physically adapt a classroom, move from one activity to another with minimal distractions, accommodate unique behavioral and medical needs, and more, this practical text also answers

important questions. Equally valuable for professionals who are including students in regular classrooms as well as for those still investigating the facts, this perceptive book gives readers an overview of the issues to consider in actively supporting the inclusion of students who are deaf-blind.

Growing Schools Debbie Abilock 2012-06-11 Presenting examples of school librarians leading professional learning in numerous contexts and for diverse learning goals with remarkable success, this book will inspire other practitioners to initiate and refine professional learning in their schools and districts. School administrators are recognizing that school librarians are ideal to lead professional development because they service the entire school network, from the students and faculty to families and the

community. As a national downturn in educational funding is diminishing districts' ability to optimally staff libraries, investing energy in professional development is a sound strategy to bring information literacy skills to every student—especially in buildings with part-time librarians, or districts with only a single librarian of record. *Growing Schools: Librarians as Professional Developers* stands apart from other works as the first book that directly addresses the potential role of the school librarian as a staff developer. Within the chapters, the authors relate their professional development journeys, collectively representing experience within K-12 public and private institutions, district and regional units, and universities across the United States and Canada. The work provides various approaches to professional development with a range of processes and techniques that have been proven effective in different contexts and in achieving diverse learning goals. Practitioners at the

building and district levels as well as school principals, state and district personnel, and library educators will find this book insightful and instructive.

Transforming Multicultural Education Policy and Practice James A. Banks 2021 Join us in celebrating the 25th anniversary of James A. Banks' *Multicultural Education Series*, published by Teachers College Press—a dynamic series consisting of more than 70 published books with many more in the pipeline. This commemorative volume features engaging, incisive, and timely selections from the bestselling and most influential books in the series. Together, these selections address how multicultural education should be transformed for a nation and world that are becoming increasingly complex due to virulent racism, pernicious nationalism, mass migrations, interracial mixing, social-class stratification, and a global pandemic. Book Features: Informative and engaging selections from the most important and influential

Ideas Plus 1984 The ideas collected in this 18th book of "Ideas Plus" come from two sources: ideas submitted at an Idea Exchange session at the National Council of Teachers of English (NCTE) annual convention or spring conference; and contributions by readers of "Classroom Notes Plus" and "Ideas Plus." Some of the teaching practices described in the book are innovative and surprising; others are adaptations on familiar ideas. The book is divided into three broad sections: (1) Prewriting and Writing (11 ideas); (2) Literature (16 ideas); and (3) Explorations (13 ideas). (NKA)

Proceedings Of The 14th International Congress On Mathematical Education (In 2 Volumes)
Jianpan Wang 2024-06-07 The International

Congress on Mathematical Education (ICME) is the largest international conference on mathematics education in the world. This quadrennial event is organized under the auspices of the International Commission on Mathematical Instruction (ICMI). This book, the Proceedings of ICME-14, presents the latest trends in mathematics education research and mathematics teaching practices at all levels. Each chapter covers an extensive range of topics in mathematics education. Volume I consists of 4 Plenary Lectures, 3 Plenary Panels, 5 Lectures of Awardees, 4 Survey Teams, 62 Topic Study Groups, 13 Discussion Groups, 20 Workshops, a Thematic Afternoon, and an Early Career Researcher Day. Plenary Lectures recognize substantial and continuing contributions to the growth of the field of Mathematics Education. Plenary Panels address three major challenges currently facing mathematics educators across the globe. The Survey Teams have a particular emphasis on identifying and characterizing

important new knowledge, recent developments, new perspectives, and emergent issues. The Topic Study Groups provides a coverage of important topics in mathematics education. Volume II consists of 50 invited lectures which present the work and reflections of both established and emerging researchers from around the world. These lectures cover a wide spectrum of topics, themes and issues that reflect the latest challenges and development in the field of mathematics education.
