Aviation Investment Doramas

Jorge-Calderón 2020-12-28

Aviation Investment uniquely addresses investment appraisal methods across the key industries that make up the aviation sector, including the airports, air traffic management, airline and aircraft manufacturing - or aeronautic - industries. This practice-oriented book presents methods through realistic case studies. It covers both economic appraisal, or cost-benefit analysis, measuring the value of projects to society, and financial appraisal, valuing projects as cash generators. This substantially expanded second

edition covers in greater detail the treatment of environmental emissions, paying particular attention to climate change. It addresses the treatment of Market-Based Mechanisms (MBMs), including cap and trade systems like ETS and offset systems like CORSIA, and compares them to environmental taxes. It also addresses the adjustments needed to measure the foreign exchange generating value of projects, relevant in the presence of trade barriers. The new edition includes two new project types. One is airport relocations, perhaps the most complex type of airport projects, where the economic case is often more nuanced than may be apparent. The second is the re-introduction of supersonic travel. Aviation Investment offers all aviation sub-sectors a single-source reference, bringing together the theoretical background of

the economic appraisal literature and aviation investment in practice. It is written in a style that is accessible to non-academic professionals, using formulae only where strictly necessary to enable practical applications, and benefits from the substantial practical experience of the author.

Social Responsibility in Tourism Martina Pásková
2024-06-24 This monograph offers a comprehensive examination of responsible tourism, meticulously deconstructing the core tenets of socio-cultural, environmental, and economic accountability within the framework of sustainable tourism. The work underscores the intrinsic significance of local attributes, emphasizing their pivotal role in shaping responsible practices. Guiding through the intricate terrain of challenges and opportunities inherent in integrating responsible paradigms within the dynamic tourism sector, the authors introduce a prescriptive implementation

framework. This framework steers tourism stakeholders towards equilibrium, enabling present actions to safeguard and augment conditions for sustainable future development. Rooted in scholarly depth, augmented by synoptic diagrams and references to supplementary resources, the book converges into an analysis of concrete instances—illustrative case studies, products, and applications—demonstrating the embodiment of social responsibility in tourism's fabric. By spotlighting both successful and adverse examples, the monograph underscores the vital interplay of environmental, economic, and socio-cultural dimensions, encapsulating the essence of responsible tourism's enduring impact.

Ivan Mutis 2018-10-08 This proceedings volume chronicles the papers presented at the 35th CIB W78 2018 Conference: IT in Design, Construction, and Management, held in Chicago, IL, USA, in October 2018. The theme of the conference focused on fostering, encouraging, and promoting research and development in the application of integrated information technology (IT) throughout the life-cycle of the design, construction, and occupancy of buildings and related facilities. The CIB - International Council for Research and Innovation in Building Construction - was established in 1953 as an association whose objectives were to stimulate and facilitate international cooperation and information exchange between governmental research institutes in the building and

construction sector, with an emphasis on those institutes engaged in technical fields of research. The conference brought together more than 200 scholars from 40 countries, who presented the innovative concepts and methods featured in this collection of papers. *Access Register* Canada 1984 Notes - Municipal Reference and Research Center Municipal Reference and Research Center (New York, N.Y.) 1929 A Decision-Makers Guide to Public Private Partnerships in Airports Andy Ricover 2019-12-06 Airport development is critical to economic growth and poverty reduction. This book will help decision-makers assess whether Public Private Partnerships (PPP) might be a viable option to meet their airport development requirements. It walks the reader through the airport PPP process, from early preparation to bringing the project to market and managing the project during implementation. The book will help eradicate misconceptions about the role

of the private sector in airport infrastructure. A Decision-Makers Guide to Public Private Partnerships in Airports provides an essential guide for those in a position to make decisions linked to airport development, to their advisers, their staff and also to students wishing to understand airport PPP.
