Transforming Teaching With Generative AI

Nick Gaspar This guide provides educators with practical tools for integrating artificial

intelligence into their K-12 and higher education classrooms. This user-friendly book breaks down

technical concepts to make AI understandable for educators without a background in

technology. It builds from trusted frameworks and connects AI to the methods and expertise

educators already bring to their teaching. Key topics include the basics of generative AI,

prompt design, classroom integration, ethical concerns, assessment design, and academic

integrity. Rather than treating AI as a challenge to work around, this guide encourages educators

to see it as a way to accelerate learning and support students more effectively. With

examples, case studies, strategies, and activities drawn from real teaching contexts, readers will

learn how to set clear expectations for AI use and build classroom cultures where students

engage with AI in thoughtful and practical ways. Transforming Teaching With Generative AI

offers teachers, teacher educators, instructional designers, and academic leaders a clear

framework for using AI with purpose and on their own terms. Book Features: Offers a real-

world approach to using AI in education, including how to think critically about ethical

challenges while staying focused on student learning. Uses clear explanations of complex

topics, from large language models to writing successful AI prompts. Provides guidance for

using AI to craft assignments, assessments, and personalize student learning. Aligns new tools

with existing teaching goals and values, including connecting AI integration to trusted

models like TPACK and TILT. Includes user-friendly features for busy educators, such as

sample prompts, checklists, and discussion questions that support reflection and ease of

implementation.
