Britain and the Economic Problem of the Cold War Till Geiger 2017-07-05 Many accounts of British development since 1945 have attempted to discover why Britain experienced slower rates of economic growth than other Western European countries. In many cases, the explanation for this phenomenon has been attributed to the high level of defence spending that successive British post-war governments adhered to. Yet is it fair to assume that Britain's relative economic decline could have been prevented if policy makers had not spent so much on defence? Examining aspects of the political economy and economic impact of British defence expenditure in the period of the first cold war (1945-1955), this book challenges these widespread assumptions, looking in detail at the link between defence spending and economic decline. In contrast to earlier studies, Till Geiger not only analyses the British effort within the framework of Anglo-American relations, but also places it within the wider context of European integration. By reconsidering the previously accepted explanation of the economic impact of the British defence effort during the immediate post-war period, this book convincingly suggests that British foreign policy-makers retained a large defence budget to offset a sense of increased national vulnerability, brought about by a reduction in Britain's economic strength due to her war effort. Furthermore, it is shown that although this level of military spending may have slightly hampered post-war recovery, it was not in itself responsible for the decline of the British economy.

On the Relationship between Apocalyptic Films and Reality in US Cold War Culture Iris Strimitzer 2022-03-17 Diploma Thesis from the year 2021 in the subject American Studies - Miscellaneous, grade: 1, University of Graz (Amerikanistik), language: English, abstract: This thesis investigates the relationship between apocalyptic fiction and reality during the Cold War era. By exploring the zeitgeist and media landscape of the American Cold War culture, this thesis demonstrates that apocalyptic fiction had a significant bilateral role during those times and influenced the contemporary nuclear discourse. This is illustrated by analyzing two popular apocalyptic movies, "On the Beach" (1959) and "The Day After" (1983). Both films portray a worst-case scenario in which the protagonists are confronted with the disastrous consequences of a nuclear war. These movies are not just blockbusters for entertainment but fuel and contribute to the ongoing nuclear discourse about the Cold War era and its politics of deterrence. In its theoretical part, this thesis provides an overview of the Cold War era and reveals how the beginning of the Atomic Age changed the dynamics of power and politics forever. It focuses on the international cultural discourse concerned with nuclear weaponry and illustrates how the politics of deterrence came into being. Afterwards, this thesis focuses on the US-specific nuclear discourse and how it was portrayed in US mainstream media. Additionally, this thesis engages with the Cold War as a concept of thought. It aims at providing a deeper understanding of its intrinsic mechanisms and explains why the Cold War can be classified as a war against people's imagination. Therefore, this thesis provides an overview of modern apocalypticism research and investigates the role of narratives in the Atomic Age. In its analytical part, the

films *On the Beach* (1959) and *The Day After* (1983) are interpreted as crisis texts according to the paradigm of apocalypticism. According to this analytical approach, this film analysis focuses on the films' contemporary cultural context and investigates how their narratives are related to the political and cultural events of the Cold War. Furthermore, this thesis investigates how the bilateral relationship between fiction and reality impact the films and their public reception. Thus, this thesis demonstrates how the films serve as an example of how and why the Cold War can be classified as a war against people's imagination.

Access to History: The USA and the Cold War 1945-63 Second Edition Oliver Edwards 2002-08-30 This second edition has been updated to take account of recent historical research into the period, including up-to-date interpretations relating to the Cuban Missile Crisis. The major issues surrounding the origins of the Cold War and its subsequent escalation into a global power struggle between the United States and the Soviet Union, are examined through an accessible narrative and comprehensive selection of sources. The author also provides an analysis of the extent to which the Cold War had an impact on America's political institutions and society. The revised study guides provide a firm basis for answering differentiated source-based and extended writing questions.

The Three Levels of Sustainability Elena Cavagnaro 2022-08-08 Understanding the complexity of sustainability is crucial for the leadership of business organizations, national governments, and non-governmental organizations. This second edition of the bestselling book *The Three Levels of Sustainability* uses the same interdependent three-level and three-dimensional framework as the first edition, encompassing societal, organizational, and individual levels, to clearly demonstrate what sustainability means and how to implement it. This new edition incorporates important developments in reporting and measuring, corporate behaviors, the impact of COVID-19, and the UN Sustainable Development Goals. More and more societies are becoming aware of their dependence on earth's resources. However, there is still a deep-rooted lack of awareness of the connection between society's ambitions for economic growth, earth's limitations, and unequal distribution of wealth. Prominent institutions and organizations and their leaders rely on the conformable belief that "more quantity" equals "more quality" and that "more growth" equals "more development". Although some progress has been made since the publication of the first edition, the world is increasingly characterized by division, rising dissatisfaction, and growing inequality between countries, communities, and people. At the same time, it is anticipated that global warming will reach a point of no return between 2030 and 2052. The fundamental paradigm shift in the way the development process must be navigated is better served by a holistic and inclusive, multilevel and multidimensional approach meant to gradually align the critical institutional and individual factors essential to the pathway toward sustainable development. The book has been established as an excellent primer to explain the complex issues around sustainability for postgraduate and undergraduate students, as well as busy professionals and those already in management and leadership positions in the private, public, or non-profit sectors.

The Dissolution of Yugoslavia and the Badinter Arbitration Commission Steve Terrett 2017-11-22 This title was first published in 2000: Yugoslavia's dissolved at a time when rhetoric of the New World Order was firmly established in legal and political discourse. Nevertheless, the largely positive appraisal of international law's response to the Iraq - Kuwait conflict has not been mirrored in relation to Yugoslavia. This book evaluates the peace-making efforts of the major institutional actors, whilst focusing specifically on the Badinter Arbitration Commission, an ad hoc EC-created organ required to provide legal advice on

the issues surrounding Yugoslavia's dissolution. Initially composed of constitutional lawyers, aiming to redraft Yugoslavia's constitution, the Commission soon faced problems of public international law. Its' jurisprudence challenges international lawyers to reassess their state-centric conceptions of international law in a world where most conflicts, war crimes and human-rights abuses exist within rather than between States. This book is vital reading for anyone interested in international law, international relations, politics and central/eastern European studies.

War, Peace and International Security Jan Eichler 2016-12-09 This book examines and explains the dialectic of war and peace between the outbreak of WWI and the Russian annexation of Crimea in 2014. The theoretical inspiration is built upon Galtung's concept of negative and positive peace, Aron's distinction between strategy and diplomacy, and Carr's theory of periodization. Here, the author compares globalization with the interwar period and examines how the first decade's positive peace, diplomacy, and big hopes were replaced by negative peace, and explains the growing role of military strategy which culminated after the Russian annexation of Crimea and the following military incidents between NATO and Russia. This volume will be of interest to teachers, students, and researchers in the fields of modern history, international security and peace studies.

A New Cold War Sanjaya Baru 2021-08-04 In July 1971, US National Security Advisor, Henry Kissinger, made a secret visit to China to meet top Chinese leaders. This inaugurated a new phase not just in US-China relations but in contemporary history. That visit and the subsequent US-China relationship, including the US decision to invest in China's economic rise and admit it into the WTO, combined to firm up the foundations of China's rise as a world power. For more than four decades, the leadership of the two countries had a secretive pact, which worked well to each other's benefit. The US helped power China's economic growth in the hope that Beijing would turn a new political leaf and adopt Western practices (e.g. democracy). China grew economically and militarily, used its financial prowess to spread its influence across continents, as four generations of Chinese leaders built their nation at the expense of the US. Half a century after Kissinger's historic visit, the US and China are today engaged in a trade war bordering on a new Cold War. Washington is not openly talking about 'de-coupling' from China, which has begun to challenge its global dominance, but it might very well be. China has already established itself as a dominant power across Eurasia. More worryingly, China is militarily and economically threatening its neighbours, including Japan, Korea, Vietnam, Taiwan, Australia, Philippines, Indonesia and India. This collection of critical essays examines the impact, consequences and legacy of Kissinger's first, door-opening visit to China and how it has shaped world order.
