Updated content includes the most current information related to infectious and immunological diseases, diagnostic testing methods, and vaccines - Clinical case studies include etiology, pathophysiology, laboratory findings, and critical thinking questions, allowing you to apply your knowledge of concepts and procedures - Visual learning features make studying easier with algorithms, illustrations, photographs, and summary boxes - Key Concepts are interwoven throughout each chapter, highlighting the most important facts - Content correlation between lecture and reading, diagnostic laboratory procedures, and case studies allows for easy reference - Learning objectives and key terms open each chapter, providing measurable outcomes and a framework for organizing your study efforts - More than 650 end-of-chapter, multiple-choice questions provide opportunities for review and self-assessment - Laboratory procedures on the Evolve website and in the eBook help you apply immunology and serology theory to clinical laboratory practice

Saunders Infection Control Reference Service Elias Abrutyn 2001 Collected into one source, this text represents the most up-to-date and officially endorsed guidelines of infection control, gathered together and organized for easy reference and use in any healthcare facility. The introductory chapters provide essential information on epidemiology, as well as background concerning the different types of guidelines for control and how they are used. The next section presents broad coverage of infection control and the key components in an infection control program. Following this foundation, the guidelines themselves are presented in sections that focus on the areas of: Facility Size or Location of Service; Site of Infection; Selected Clinical Problems; and Facility-Based Guidelines. Experts in infection control offer a "guide to the guidelines" with their succinct interpretations and critiques of each guideline, providing insight into what works, what doesn't, and why. Where applicable, the guidelines are reproduced at the end of the chapter either in full or in extract format.

The Nursing Assistant JoLynn Pulliam 1998 This full-color text is popular with both students and teachers alike because it's concise, and practical. The second edition reflects the most recent practice requirements including the latest Center for Disease Control (CDC) guidelines, OSHA mandates regarding infection control, as well as OBRA training requirements and updates. It also includes a detailed, quick reference guide to using age-specific care considerations in patient care, an enhanced patient restraints section that outlines the correct application of the most commonly used restraints, as well as a chapter on subacute care. New critical thinking exercises help students apply what they've learned.

Infection Control Issues in the Environment of Care 2005 Disease-causing organisms result in nearly two million infections in hospitals each year and nearly 88,000 patients die as a result. The text addresses the unique infection control issues within the environment of care for all health care settings.

Infection Control & Management of Hazardous Materials for the Dental Team Chris H. Miller 2005 This comprehensive text addresses the issues of controlling the spread of disease agents and maintaining safety in the dental office. It emphasizes the basic concepts of infectious disease and the actual practice of infection control, and describes the specific procedures used and the supplies and equipment needed for disease prevention and office safety. Written at a level appropriate for the entire dental team, the book reflects the new legislation passed for the protection of dental patients and dental workers, and shows how these mandates have changed the way dental care is provided. Logical organization of topics allows better comprehension and enhanced readability. The inclusion of tables, boxes, and illustrations helps to reinforce important information. Microbiology and other basic topics are covered, with descriptions of bacteria, viruses, and fungi, and the development of infectious diseases, oral microbial diseases, and bloodborne disease agents. Bloodborne pathogens are discussed, including hepatitis, HIV, and tuberculosis. The text addresses how diseases are spread, and how the spread of disease can be prevented. Detailed information is provided on office management, including the office safety program, how to manage chemicals, and how to prepare and

implement a fire/emergency action plan. Content has been updated to reflect new laws, regulations and procedures. Two completely new chapters have been added: About the Occupational Safety and Health Administration (OSHA), and Infection control concerns during remodeling/construction. More "step-by-step" procedure boxes are featured, giving detailed instructions on how to perform procedures such as instrument processing, following up on a sterilization failure, and the use of surface covers. Appendix C, CDC guidelines for infection control in dental health care settings 2003, reflects the most up-to-date information available. Added is Appendix G, on the Health Insurance Portability and Accountability Act (HIPAA) of 1996. Review questions are added at the end of each chapter, with answers in the back of the book. A detailed outline is now included at the beginning of each chapter. Key terms are included at the beginning of each chapter, and bolded upon first mention. New illustrations and a two-color design have been added.

The Individual Support Worker Geoff Arnott 2023-09-01 The Individual Support Worker is designed to meet the needs of workers in the home, community and/or a residential setting, who are required to provide person-centred support to people who are ageing and/or have a disability-related condition. The person-centred approach is reflected in all of the 21 chapters reflecting the introduction of Consumer Directed Care and the National Disability Insurance Scheme (NDIS). The text is organised in core and elective units for the Certificate III in Individual Support. Addressing all mandatory core and the specific elective streams of Ageing and Disability, each chapter follows the unit guide for a specific competency. After the learning objectives and introduction, the major section headings align with the competency elements, and the topic headings' corresponding criteria. Knowledge Evidence is addressed as specific topic headings within the performance criteria. Throughout the chapters, students are asked to reflect or self-assess via activities such as scenario-based questions. Each chapter culminates in a summary.
