High-tech Teaching Success!
Kevin D. Besnoy 2010 An easy-to-use guide to implementing the most exciting technologies to energize any classroom, *High-Tech Teaching Success! A Step-by-Step Guide to Using Innovative Technology in Your Classroom* gives classroom teachers exactly what they're looking for: advice from technology education experts on how the latest tools and software can be implemented into lesson plans to create differentiated, exciting curriculum for all learners. Focused on implementing technology in the four core areas of learning—math, science, language arts, and social studies—this book covers topics like podcasting, blogging and digital diaries, building Web sites and Wikis, creating Web Quests, using Google Earth, using online programs like YouTube and social networking sites to connect to other classrooms, creating videos, and more. Geared for teachers in grades 4–8, this essential book offers practical tools, tips for implementation,

step-by-step instructions, and handy screen shots to give educators everything they need to create interesting, technology-based learning experiences in their classrooms. Features lessons developed by top educators covering Google Earth, YouTube, wikis, WebQuests, and much more Includes screen shots and easy-to-follow directions for using each technology tool Suggests innovative ways of implementing tools like website design, podcasts, social networking, and blogging Gives teachers an overview and advice on implementing the latest exciting technology tools Prufrock Press offers award-winning products focused on gifted, advanced, and special needs learners. For more than 20 years, Prufrock has supported parents and teachers with a wide range of resources based on sound research. The average day of a parent or teacher of a gifted or special needs learner is filled with a thousand celebrations and challenges. Prufrock's goal

Teaching Students who are
Exceptional, Diverse, and at
Risk in the General Education
Classroom Sharon Vaughn

2007 Based on the belief that even small accommodations make a difference in the success of students with disabilities, this text provides

classroom teachers with the knowledge, tools, and practical strategies that will empower them to spark learning in every student. From students with disabilities, culturally diverse students, and students with limited English proficiency to economically disadvantaged students Vaughn/Bos/Schumm provides teachers with the tools they need in their diverse classrooms. Revised to reflect recent changes in the law (IDEA 2004 & No Child Left Behind) and current terminology, the strength of the book continues to be its numerous learning activities and sample lessons addressing both elementary and secondary classrooms. This edition continues its very popular multi- chapter unit on curriculum adaptations with specific strategies and activities for teaching reading, writing, mathematics, content areas, and study skills, which has been further strengthened by a new capstone chapter on teaching self-advocacy, study skills and strategies. The strong emphasis on

professional planning and collaboration make it an excellent resource for all teachers. The newest edition features a new chapter on Autism; a new chapter on Developing Independence in Learning; an all new "Tech Tips" features that has received rave reviews; a revised chapter "Managing Student Behavior" that emphasizes school-wide behavior management and positive behavioral support; an expanded chapter on "Collaborating and Coordinating with Other Professionals and Family Members" with increased coverage of co-teaching; a revised chapter on "Planning and Grouping Strategies for Special Learners" that reflects an increased emphasis on grouping; and expanded coverage of secondary education via chapter-opening interviews, new photos, and new examples throughout the text.

Teaching Science in Elementary and Middle School Classrooms Joseph S.

Krajcik 2003 This text provides an overview of current science teaching practices for the elementary and middle grades. The authors, top scholars in the field of science education, believe that all children should develop an in-depth and meaningful understanding of scientific concepts and processes. To achieve this, the text utilizes the Project Based Approach. Project-based science stresses that science teaching should emphasize the active engagement of students in science, rather than teachers telling students information. Each chapter has several Portfolio Activity boxes that provide active learning experiences or reflections for the student. Like the first edition, the text includes numerous strategies in each chapter that help both new and experienced teachers understand how to teach science in an active and engaging manner. The text also shows teachers how to implement the National Science Education Standards (NSES) and constructivist

strategies. A NSES marginal feature keys content to the standards. Moreover, this textbook helps teachers learn how to implement all of today's major reforms; not just read about them.

The Power of Projects Judy Harris Helm 2003 This timely volume will help teachers on the front line to tackle the challenges they face in today's classrooms with children ages 3-8. The authors show how good project work can provide solutions to problems that seem overwhelming to many teachers of young children. They offer practical strategies

with examples to maximize the benefits of project work in classrooms where teachers face these 5 key challenges: Overcoming the ill effects of poverty Moving young children towards literacy Responding to children's special needs Helping children learn a second language Meeting standards effectively.

"Teachers can respond to challenges and at the same time help to set the foundations for the children's future by incorporating good project work into the early childhood curriculum." —Excerpt from chapter by Lilian G. Katz

"Those committed to excellence in the teaching of young children will find the specific methods needed in this work. The teacher practices that increase achievement are all here." —Martin Haberman, author of *Star Teachers of Children in Poverty*
