Visual Concept Reviews Richard O. Straub 2006-08-30 This full-color booklet--available for free when shrink-wrapped with the book or Study Guide--offers fill-in-the-blank style concept charts that allow students to apply their understanding of the concepts to real-life situations (with answers in an appendix). Some of the Concept Reviews focus on the biopsychosocial approach, thus extending the levels of analysis theme that David Myers has further applied in the text, for this edition.

Environmental Science: A Global Concern William Cunningham

2009-09-18 *Environmental Science: A Global Concern, Eleventh Edition*, is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility, and global awareness. This book is intended for use in a one- or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level. We have updated data throughout the chapters in this book. Information and examples presented are the most recent available as of the mid-2009. You will find an abundance of specific numbers and current events – details that are difficult to keep up-to-date in a textbook. The goal of this book is to provide an up-to-date, introductory global view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles. Because most students who will use this book are freshman or sophomore non-science majors, the authors make the text readable and accessible without technical jargon or a presumption of prior science background.

Hydrogen and e-Mobility J. Jay Liu 2025-10-01 *Hydrogen and e-Mobility: Technologies, Integration, and Optimal Management* demystifies hydrogen-fueled transport, from foundational principles to real-world implementation and problem-solving. The book presents conceptual methodologies and techno-economic solutions for the applications of hydrogen in e-mobility, including system aspects of hydrogen-based mobility. This holistic approach covers essential technologies from the fundamental economic and technical assessment of hydrogen-capable vehicles to charging infrastructure, energy storage solutions, and urban public transport. Presenting a coherent program from global experts, this book supports readers taking their first steps in hydrogen vehicles and

offers new insights to researchers and engineers looking for more advanced applications. - Provides a well-rounded overview of the essential principles, challenges, and advances at the cutting edge of hydrogen-powered mobility - Includes learning objectives and practice questions for each chapter to support understanding and application - Builds practical skills, including MATLAB code on a companion website, allowing for the design of reliable, resilient hydrogen-based transport systems

Environmental Science Robert K. Kaufmann 2008 Unlike any other introductory environmental science text, Robert Kaufmann and Cutler Cleveland's "Environmental Science" takes a fresh approach to the subject by weaving themes of energy and materials, economic systems, and policy throughout the entire text. A story of real science is simply told through examples of cutting-edge content, real-world applications, and a distinctive conceptual illustration program..

Implementing the Sustainable Development Goals in Nigeria

Eghosa O. Ekhaton 2021-10-11 This book explores Nigeria's progress

towards achieving the Sustainable Development Goals, presenting key country-specific lessons, as well as providing innovative solutions and practices which are transferrable to other emerging economies. Despite all of Nigeria's potential, and substantial oil revenues, poverty remains widespread and the country faces many challenges. The contributors to this book provide comparative historical and contemporary analysis of the main challenges for achieving progress in the SDGs, and make recommendations for the most effective ways of developing, adopting, disseminating and scaling them. Starting with the conceptualisation and evolution of the SDGs, the book goes on to consider the goal on ending poverty, and the urgent need to combat climate change and its impacts. The book also reflects on the role of business and taxation, and the cultural and societal dimensions of the SDGs, including education, gender, and the role of the church. Overall, the book focuses on knowledge/implementation gaps and the role of collaborative partnerships and disruptive technologies in implementing the framework in general. This book will be of interest to scholars, policy makers and practitioners of sustainable development and African studies, as well as those with a particular interest in Nigeria.

Environmental Science Daniel Chiras 2010 Completely updated, the eighth edition of 'Environmental Science' enlightens students on the fundamental causes of the current environmental crisis and offers ideas on how we, as a global community, can create a sustainable future.
