Multiple Literacies, New Pedagogy Jeeva Ratna Roche-Smith 2004

This dissertation explores a technologically intensive after-school program to determine what literacy practices develop, and what alternative spaces are created in which learning can take place. Using qualitative methods and a socio-cultural lens, this research is an examination of adolescents' learning and development, in the process of creating digital stories (multimedia compositions) over two semesters. It documents the complexities and opportunities that are born when participants from different cultural worlds come together to learn and play.
