**My Own Blood** Ashley Bristowe 2023-06-13  
Mothering under normal circumstances takes all you have to give. But what happens when your child is disabled, and sacrificing all you've got and more is the only hope for a decent future? Full of rage and resilience, duty and love, Ashley Bristowe delivers a mother's voice like no other we've heard. When their second child, Alexander, is diagnosed with a rare genetic disorder, doctors tell Ashley Bristowe and her husband that the boy won't walk, or even talk—that he is profoundly disabled. Stunned and reeling, Ashley researches a disorder so new it's just been named—Kleefstra Syndrome—and she finds little hope and a maze of obstacles. Then she comes across the US-based "Institutes," which have been working to

improve the lives of brain-injured children for decades. Recruiting volunteers, organizing therapy, juggling a million tests and appointments, even fundraising as the family falls deep into debt, Ashley devotes years of 24/7 effort to running an impossibly rigorous diet and therapy programme for their son with the hope of saving his life, and her own. The ending is happy: he will never be a "normal" boy, but Alexander talks, he walks, he swims, he plays the piano (badly) and he goes to school. This victory isn't clean and it's far from pretty; the personal toll on Ashley is devastating. "It takes a village," people say, but too much of their village is uncomfortable with her son's difference, the therapy regimen's demands and the family's bottomless need. The health and provincial services bureaucracy gives them a maddening

set of hoops to jump through, displaying criminally low expectations about what they can do to help. My Own Blood is an uplifting story, but it never shies away from the devastating impact of a baby that science couldn't predict and medicine couldn't help. It's the story of a woman who lost everything she'd once been—a professional, an optimist, a joker, a capable adult—in sacrifice to her son. An honest account of a woman's life turned upside down.

**Chernobyl Heart** Adi Roche 2006 "On 26 April 1986, Reactor No 4 of the Chernobyl nuclear processing plant exploded, releasing radiation 90 to 150 times greater than that released by the Hiroshima bomb. Now, to mark the 20th anniversary of the disaster, the woman who has become irrevocably associated with saving the

lives of thousands of children delivers her testament to a disaster, the appalling legacy of which remains etched on the physical and emotional landscape of the devastated region. Including a foreword by President Mary McAleese alongside searing personal testimonies, remarkable photography and expert opinion, Chernobyl Heart tells of Adi's struggle to help the survivors in their desperate attempts to rebuild their lives, a struggle that has taken her as far as the UN and the Oscars."--BOOK JACKET.
