Rib Fracture Management Marc de Moya 2018-09-03 In recent years the approach towards rib fractures has evolved. Abandoned in the past, due to inadequate instrumentation and lack of evidence, rib fixation has recently re-emerged as a treatment option for trauma patients. There have been a number of advances over the last 25 years that now allow surgeons to internally fix rib fractures that otherwise may have not had other options. However, as a result there has been a rapid increase in literature and many institutions interested in initiating rib fixation programs. Due to a variety of practitioners involved namely, trauma surgeons, orthopedic surgeons, and thoracic surgeons there has been no comprehensive guide to patient selection, technique, and post-operative care. The purpose of this text is to fill the educational gap for those trauma, orthopedic, and thoracic surgeons interested in learning the cutting edge evidence-based approaches to treatment of rib fractures. This topic has caught the interest of many and has been a recurrent theme at surgical meetings over the last two years. Although there has been ever increasing levels of interest and experience nationally there are many questions which remain. This text will provide not only the theoretical background for improving outcomes in those with rib fractures but also serve as a practical guide to those interested in starting new programs. The text will include tips and tricks that can be used in the OR or at the bedside to improve patient care. Therefore, the focus will be on a comprehensive review but also including tips and tricks from the most experienced surgeons around the country who are performing internal fixation for rib fractures.

Understanding the Airport's Role in Performance-based Navigation Sebastian D. Timar 2016 "TRB's Airport Cooperative Research Program (ACRP) Report 150: NextGen for Airports, Volume I: Understanding the Airport's Role in Performance-Based Navigation: Resource Guide, the first report in this series, provides comprehensive information to practitioners concerning all aspects of Performance-Based Navigation (PBN) and how implementation affects overall airport operations. This Resource Guide encompasses background information, description of effects on short- and long-term airport development, impacts on safety and performance measures, and other critical factors affecting future airport operations. In addition to providing guidance to users on available resources for additional assistance, this volume also includes lessons learned and best practices based on findings from case studies that examined the airport operator's role in PBN implementation. The Next Generation Air Transportation System (NextGen) refers to the

federal programs (predominately airspace, air traffic, or avionics related) that are designed to modernize the National Airspace System (NAS). ACRP's NextGen initiative aims to inform airport operators about some of these programs and how the enabling practices, data, and technologies resulting from them will affect airports and change how they operate."--Publisher.

Coders' Desk Reference for Procedures (ICD-10-PCS) 2018 2017-10-15 The Coders' Desk Reference for ICD-10-PCS Procedures addresses the challenge of translating common procedural nomenclature used by providers to the corresponding ICD-10-PCS coding terminology. Because provider documentation often does not reflect the precise terminology found in ICD-10-PCS, correct procedure coding is dependent on the ability of the coder to translate common procedural terminology to the appropriate procedural terminology of ICD-10-PCS. This resource is organized by common procedural nomenclature used in the hospital setting and then linked to the related root operation table(s); the procedure is described in layman's terms, translated to ICD-10-PCS root operation terminology, and the corresponding root operation table(s) is identified.
