The Elements of Ethical Dilemmas: Applied Psychology Ethics in Australia is a comprehensive and applied guide to practising psychology in an ethical and professional manner. This book is designed to assist applicants for general registration as a psychologist successfully navigate one of the eight core competencies for general registration set by the Psychology Board of Australia; specifically ethical, legal, and professional matters. The exploration of ethical dilemmas is a core task for the 4+2 pathway to general registration, while related ethical applications require exploration in the 5+1 and higher education pathways to registration as well. This book will teach readers how to identify, explore, and choose the appropriate professional course of action when confronted by ethical dilemmas in practice. The chapters include personal reflections from expert contributors relating to each of the ethical dilemmas, expertly highlighting clients' and stakeholders' circumstances, ethical codes and guidelines, scholarship and research, as well as other key elements in the ethical decision-making process. Especially relevant to those applying to become a registered psychologist in Australia, this book offers invaluable guidance on responding to ethical dilemmas as required by the Psychology Board of Australia in various pathways to general registration.

**Caring for Veterans and Their Families: A Guide for Nurses and Healthcare**

**Professionals** Rita F D'Aoust 2021-11-08  
Of the approximately 20 million veterans of the U.S. armed forces, less than half utilize the Veteran's Health Administration health care system. That means the majority of veterans are receiving care from nurses and healthcare professionals who may not be trained in treating or caring for patients who have served in the military. This unique book guides nurses and healthcare professionals through the specific set of needs veterans can present, including but not limited to PTSD. Topics covered include, defining

military culture and how to apply that knowledge to provide informed treatment, transitioning from service to civilian life and the many challenges expected during re-adjustment and re-entry, recognizing and treating substance use disorders, identifying suicidal behaviors and warning signs, long-term care for elderly veterans, and many more topics unique to the healthcare of veterans.
