Prevent math anxiety — by playing games! You'll love these math games because they give your child a sturdy foundation for understanding addition and subtraction. Help your child learn mental flexibility by playing with numbers, from basic math facts to the hundreds and thousands. Logic games build strategic thinking skills, and dice games give students hands-on experience with probability.

Addition & Subtraction features 23 kid-tested games, offering a variety of challenges for elementary-age students. Chapters include: • Tens and Teens: Master the concept of number bonds — the relationship between a whole number and the parts that combine to make it — and build a logical foundation for future math. • Numbers to One Hundred: Develop mental math skills for working with larger numbers. Practice using place value, addition, and subtraction. • Mixed Operations: Give mental muscles a workout with games that require number skills and logical thinking. • Logic and Probability: Logic games sharpen inductive and deductive thinking skills, while games of chance build an intuition for probability. Math games protect your child from math phobia. Games pump up your child's mental muscle, reduce the fear of failure, and

generate a positive attitude toward mathematics. Parents can use these games to enjoy quality time with your children. Classroom teachers like them as warm-ups and learning center activities or for a relaxing review day at the end of a term. If you are a tutor or homeschooler, make games a regular feature in your lesson plans to build your students' math skills. So what are you waiting for? Clear off a table, grab a deck of cards, and let's play some math!

*Countdown Coach,  
Mathematics Level H (30pk)*

Evelyn A. Pesiri 2006-03-08  
The Mathematics Countdown Coach helps students use a 4-step problem-solving process, Gather, Organize, Answer, and Look Back, and clearly explains key problem-solving strategies. This Coach is aligned To The NCTM Standards, teaches critical skills, and fully prepares students for standardized math tests. Each

student text contains three Practice Tests - Guided Practice, Practice with Hints, and Independent Practice. In Guided Practice, each question provides an appropriate strategy, As well as detailed hints on how to solve the problem. The Practice with Hints section includes a suggested strategy and a less detailed hint. The Independent Practice section gives students an opportunity to solve problems without help. Practice on all assessment forms is included-multiple-choice, gridded response, short response and extended response. The instruction in Mathematics Countdown Coach reflects NCTM content and process standards, The same standards used by states to align their state-specific curriculum. This series fully complements our state-specific Coach materials. After students learn essential skills from the Coach text, they can use the Countdown for additional practice.

*Math You Can Play Combo*

Denise Gaskins 2015-08-19

Math Your Kids WANT to Do.

You'll love these math games because they give your child a strong foundation for mathematical success. By playing these games, you strengthen your child's intuitive understanding of numbers and build problem-solving strategies. Mastering a math game can be hard work. But kids do it willingly because it's fun. Math You Can Play Combo features two books in one, with 42 kid-tested games that offer a variety of challenges for preschool and school-age learners. Chapters include: • Early Counting: Practice subitizing —

recognizing small numbers of items at a glance—and learn the number symbols. •

Childhood Classics: Traditional folk games invite the whole family to enjoy playing with math. • Number Bonds: Build a mental picture of the relationships between numbers as you begin to explore addition. • Numbers to One Hundred: Develop mental math skills for working with larger numbers. Practice using place value, addition, and subtraction. • Mixed Operations: Give mental muscles a workout with games that require number skills and logical thinking. • Logic and Probability: Logic games sharpen inductive and deductive thinking skills, while games of chance build an intuition for probability. Math games prevent math anxiety. Games pump up your child's mental muscle, reduce the fear of failure, and generate a positive attitude toward mathematics. Parents can use these games to enjoy quality time with your children. Classroom teachers like them

*Cases on Informal Learning for Science and Mathematics Education* Sun, Li 2025-04-17

Many educators face the challenge of engaging students

in science and mathematics, often struggling to bridge the gap between theoretical concepts taught in classrooms and their real-world applications. This disconnect can lead to disinterest and disengagement among students, hindering their learning outcomes. Cases on Informal Learning for Science and Mathematics Education offers a solution to this problem by showcasing how informal learning experiences can significantly enhance students' understanding and engagement in these subjects. This book demonstrates the potential of informal learning to support and complement formal classroom instruction by presenting a rich collection of case studies. It highlights how activities such as cooking, budgeting, visiting museums, and participating in after-school math clubs can serve as valuable informal learning experiences that deepen students' understanding of science and mathematics concepts. The book also addresses the challenge of

recognizing the value of informal knowledge in problem-solving, offering insights and strategies for educators to help students leverage their informal learning experiences.
