*Think Tank Library* Mary Boyd Ratzer

2015-01-22 Transform your library into a "think tank" by helping teachers create an active learning environment in which students question, investigate, synthesize, conclude, and present information based on Common Core standards. The rigors of today's mandated academic standards can repurpose your library's role as a steward of the Common Core State Standards (CCSS) at your school. Created for teachers of grades 6 through 12, this guide will help you help present exciting, field-tested lessons that address developmental steps and individual differences in key competencies in the CCSS. Authors and educators Mary Ratzer and Paige Jaeger illustrate how brain-based learning helps students become deep, critical thinkers, and provide the lesson plans to coax the best thinking out of each child. This tool book presents strategies to help learners progress from novice to expert thinker; challenge students with questions that lead to inquiry; incorporate "rigor" into lessons; and use model lesson plans to change instruction. Beginning chapters introduce the basics of instruction and provide ideas for expert cognitive growth of the brain. Sample lessons are aligned with key curriculum areas, including science, social studies, music, art, and physical education.

**Culturally Responsive Assessment in**

**Classrooms and Large-Scale Contexts** Carla

M. Evans 2025-03-10 Culturally Responsive Assessment in Classrooms and Large-Scale Contexts explores how scholars and professionals in educational measurement and assessment can use the unique cultural and social identities of students to shape assessment purpose, design, implementation, use, and validation processes. Despite the sheer diversity

of student populations in the United States, the tools used to understand their performance and progress have not substantively changed in decades. Large-scale testing and related policies still privilege "culturally neutral" test content, standardization, and comparability. Classroom assessments often mimic these procedures, even though rich tasks and activities could easily be incorporated into curriculum and instruction to allow students to see themselves, their interests, communities, beliefs, and backgrounds represented and valued. This book collects the theory, research, and best practices that are essential to ensuring cultural responsiveness in classroom assessment and standardized testing procedures, policies, and practices. Chapters by assessment and measurement experts along with scholars who are experts in sociocultural learning theory, philosophy of education, critical theories, multilingual education, and Indigenous education, summarize findings from existing research and suggest how future research can move classroom and industry practice as well as federal, state, and local policy forward.

**Applying Depth of Knowledge and Cognitive  
 Rigor** Karin Hess For more than 2 decades,  
 Karin Hess has worked with the concept of  
 depth of knowledge (DOK) and expanded  
 applications of cognitive rigor across content  
 areas and grade levels, proving that every  
 student can experience deeper learning. This  
 interactive book offers a self-guided journey  
 beginning with the basics: what DOK is, what it  
 is not, and debunking common misconceptions  
 about rigor. Karin shares how she synthesized  
 ideas from various thinking models with DOK as  
 the foundation to create the Hess Cognitive  
 Rigor Matrices, now used in more than 100  
 countries. Each module is framed by frequently  
 asked questions and provides practical tools and  
 strategies for applying a cognitive mindset that  
 supports student-centered classrooms—from  
 planning instruction that shifts student roles  
 from taking in information to constructing  
 meaning, to monitoring progress with  
 assessments that uncover thinking. This unique,  
 action-oriented workbook is a perfect companion  
 to Karin’s earlier books and a great DOK  
 refresher for PK-12 staff! Learn how to: Build a  
 shared understanding of DOK and rigor among  
 your teaching colleagues. Shift DOK levels in  
 order to shift teacher-student roles in support of  
 learning transfer. Create actionable standards-  
 based and competency-based  
 assessments. Analyze and adapt current  
 curricular and assessment materials. Explore  
 applications of DOK in progress monitoring and  
 grading.
