Integrated and Participatory Water Resources Management

- Practice Rodolfo Soncini-Sessa 2007-10-16 A participatory and integrated procedure for the planning of water resources is presented and illustrated through its application to a real-world case study: the planning of a trans-boundary, multi-purpose, regulated lake. Methods and concepts from Hydrology,

System Analysis, Optimal Control, Decision and Negotiation Theory are presented and framed in a comprehensive and coherent procedure for the efficient development of the decision-making process. Relevant theoretical and mathematical aspects are briefly presented for the non-expert reader, as well as all those practical details that are often omitted in texts, but that constitute the very essence of a project and make the difference between a successful project and a failure. The book provides practicing professionals, decision-makers and scientists with a complete, immediate example of application of the Integrated Water Resource Management paradigm. - Complete development of a real world application of IWRM - Integration of technical modelling and control aspects with participatory and decision-making issues

Twentieth-century Fabrics

Doretta Davanzo Poli 2007
Following the publication of Italian Ceramic Art, Skira presents a compilation devoted primarily to the modern decorative arts, that will offer a highly extensive and versatile anthology of writings, accompanied by technical and in-depth captions, and a scientifically documented, yet concise and absorbing essay. The collection is organized chronologically starting with the fabrics conceived by the artists of the Secessions Movements in Germany in the 1900s, such as Moser, Hoffman, and Klimt. This volume then takes an in-depth look at subsequent artists and periods such as Art Nouveau; the fabrics of Deco and Novecento design; European and American production in the 1950s, which show the influence from informal artistic culture; and the experiences of Pop Art, Op Art and Kinetic Art, including their contemporary successes. This volume includes biographies of the designers and main

manufacturers, a glossary of technical terms, a thematic bibliography, and an index of names that will prove highly useful for specialists, collectors, and those who simply have an interest in art history.
