Transactions on Edutainment IV Xiaopeng Zhang 2010-08-28 E-learning and digital entertainment techniques, tools and systems are becoming popular and can be found in many real-world educational applications in many countries. The driving force behind these technologies is the rapidly growing requirements of edutainment, especially from the perspective of the users. This has led to the increasing interest of researchers in this area. The articles in this issue give a rich overview of how edutainment technologies can be creatively used for training and education purposes. The first 12 articles of this issue represent a selection of outstanding contributions from Edutainment 2010, the 5th International Conference on E-learning and Games, held in Changchun, China, in August 2010. The main purpose of this event is to facilitate the discussion, presentation, and information exchange on the scientific and technological developments in the emerging field of digital entertainment techniques and systems for education. These 12 papers concentrated on three aspects: e-learning system and applications, game techniques for learning, and virtual reality techniques for entertainment. They are closely related to the topics of this journal.

Designing Learning for Tablet Classrooms Donovan R. Walling 2014-02-04 The versatile, cost-effective technology of the tablet computer has proved to be a good fit with the learning capabilities of today's students. Not surprisingly, in more and more classrooms, the tablet has replaced not only traditional print materials but the desktop computer and the laptop as well. *Designing Instruction for Tablet Classrooms* makes sense of this transition, clearly showing not just how and why tablet-based learning works, but how it is likely to evolve. Written for the non-technical reader, it balances elegant theoretical background with practical applications suitable to learning environments from kindergarten through college. A wealth of specialized topics ranges from course management and troubleshooting to creating and customizing e-textbooks, from tablet use in early and remedial reading to the pros and cons of virtual field trips. And for maximum usefulness, early chapters are organized to spotlight core skills needed to negotiate the new design frontier, including: Framing the learning design approach. Analyzing the learning environment. Designing learning that capitalizes on tablet technology. Developing activities that match learning needs. Implementing the learning design. Conducting evaluations before, during, and after. This is proactive reading befitting a future of exciting developments in educational technology. For researchers and practitioners in this and allied fields, *Designing Instruction for Tablet Classrooms* offers limitless opportunities to think outside the box.

The Well-Trained Mind Susan Wise Bauer 2009-05-04 "If you're a parent who has decided to educate your children yourself, this book is the first you should buy."—*Washington Times* The *Well-Trained Mind* will instruct you, step by step, on how to give your child an academically rigorous, comprehensive education from preschool through high school—one that will train him or her to read, to think, to understand?, to be well-rounded and curious about learning. Veteran home educators Jessie Wise and Susan Wise Bauer outline the classical pattern of education called the trivium, which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school "grammar stage," the middle school "logic stage," and the high school "rhetoric stage." Using this theory as your model, you'll be able to instruct your child in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music, regardless of your own aptitude in those subjects. This newly revised edition contains completely updated ordering information for all curricula and books, new and expanded curricula recommendations, new material on using computers and distance-learning resources, answers to common questions about home education, information about educational support groups, and advice on practical matters such as working with your local school board, preparing a high school transcript, and applying to colleges.
