The Complete Book of Foaling

Karen E. N. Hayes 1993-02-15  
The author, a veterinarian, explains the whole process, step by step, from three weeks before foaling, through the new baby's first twelve hours, along with a section on how to predict when the foaling will occur. The book troubleshoots problems, explains why a problem has occurred, and what must be done to correct it.

*Nano Drug Delivery for Cancer Therapy* Firdos Alam Khan  
2024-01-08 This book discusses the various modes and methods of nano-based drug delivery in different types of cancers such as colon, breast, cervical, ovarian, and lung cancer. It reviews the significance of nano drug delivery in cancer therapy, the application of

nanoparticles in overcoming drug resistance, targeted therapy, and immunotherapy.

The book also covers topics related to the synthesis of different types, shapes, and sizes of nanocarriers using synthetic and biological approaches. Further, a chapter explores the synthesis of nanocarriers loaded with anti-cancer drugs by using functionalization or conjugations and encapsulation methods. The book also examines the nanocarriers as delivery vehicles for chemotherapeutic agents against cancers using in vitro and animal models of cancers, preclinical trials for efficacy, and safety profiling of nanocarriers. Finally, future trends and innovation in nano drug delivery for cancer therapy, application of siRNA (nanoparticle-based RNA)therapy, ultrasound-linked nano-cancer therapeutics, and application of

exosome-based cancer therapy topics are discussed. Towards the end, the book examines the limitations of nanocarriers, including the cell and tissue toxicity, genotoxicity, and scale-up of nanomaterials, health and environmental hazards associated with nanoformulation synthesis, respiratory diseases, government regulations, and ethical issues.

Digital Agritechology Toby Mottram 2022-08-24 Digital Agritechology: Robotics and Systems for Agriculture and Livestock Production describes how systems acquire and use data in livestock production and agricultural systems, and how researchers can extract and aggregate efficiencies. The origins of digital

agritechnology are decades old, with robotic milkers available for over 20 years and GPS-based tractor controls existing for nearly 30.

However, only a few capabilities of these sensing and control systems are used. This book addresses the need to educate agriculturists on the full usage scale of these arable and livestock systems. -

Features how-to guides on extracting and analyzing data from digital systems - Describes quality standards for data security and transmission - Focuses on state-of-the-art systems in livestock production, along with arable and indoor agriculture
