Matthew Sorell 2009-05-26 The Second International Conference on Forensic Applications and Techniques in Telecommunications, Information and Multimedia (e-Forensics 2009) took place in Adelaide, South Australia during January 19-21, 2009, at the Australian National Wine Centre, University of Adelaide. In addition to the peer-reviewed academic papers presented in this volume, the conference featured a significant number of plenary contributions from recognized national and international leaders in digital forensic investigation. Keynote speaker Andy Jones, head of security research at British Telecom, outlined the emerging challenges of investigation as new devices enter the market. These include the impact of solid-state

memory, ultra-portable devices, and distributed storage - also known as cloud computing. The plenary session on Digital Forensics Practice included Troy O'Malley, Queensland Police Service, who outlined the paperless case file system now in use in Queensland, noting that efficiency and efficacy gains in using the system have now meant that police can arrive at a suspect's home before the suspect! Joseph Razik, representing Patrick Perrot of the Institut de Recherche Criminelle de la Gendarmerie Nationale, France, summarized research activities in speech, image, video and multimedia at the IRCGN. The plenary session on The Interaction Between Technology and Law brought a legal perspective to the technological challenges of digital forensic investigation. **IBM Personal Computer XT, the Software Guide** Gerald VanDiver 1983 Provides

**Using the Asus Eee PC** Bill Lawrence 2008-09-15 Asustek has introduced a single line of ultra-portable computers that could surpass all of Apple's Macintosh sales. Of that total, about 1.6 million units will be equipped not with Windows, but Xandros Linux. The Eee is designed to open up new market segments: In the U.S and other developed nations, it will be targeted largely at school students. Equipped with both "learning" programs as well as office and internet applications, the Eee will provide everything that students need regardless of their grade level. Because it is an ultra-light, highly mobile, yet fully capable computer, it

will also appeal to business users and first-time computer buyers. This book will cover everything, from turning the machine on and connecting it to the internet, to how to upgrade, update, and generally get the most from these tiny computers.
