Congressional Record United States. Congress 1964 The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

The Strategy of Global Branding and Brand Equity Alvin Lee 2015-03-02 Why does a customer choose one brand over another? What are the factors which would make an individual more inclined to choose your brand? This book offers a way to predict which brand a buyer will purchase. It looks at brand performance within a product category and tests it in different countries with very different cultures. Following the Predictive Brand Choice (PBC) model, this book seeks to predict a consumer's loyalty and choice. Results have shown that PBC can achieve a high level of predictive accuracy, in excess of 70% in mature markets. This accuracy holds even in the face of price competition from a less preferred brand. PBC uses a prospective predicting method which does not have to rely on a brand's past performance or a customer's purchase history for prediction. Choice data is gathered in the retail setting - at the point of sale. The Strategy of Global Branding and Brand Equity presents survey data and quantitative analyses that prove the method described to be practical, useful and implementable for both researchers and practitioners of commercial brand strategies.

The Special Educator's Guide to Assessment Tara S. Guerriero 2020-07-23 Special education students often learn about the characteristics of disabilities, but can lack an understanding of the relationship between diagnostic assessment and eligibility for special education services. The Special Educator's Guide to Assessment: A Comprehensive Overview by IDEA Disability Category focuses on the role that assessment plays in the diagnosis of a disability, determination of eligibility for special education services, and education of students with disabilities to provide a meaningful interconnection between assessment concepts and classroom application for teachers. Authors Tara S. Guerriero, Mary A. Houser, and Vicki A. McGinley want to ensure that future special education teachers have the preparation to provide comprehensive instruction to P-12 students through this text. While special education teachers are often not the ones conducting comprehensive evaluations, it is paramount that they understand their students' individual characteristics, and understand how assessment is used to determine diagnosis and eligibility. Framing the text around The Individuals with Disabilities Act (IDEA) provides students with concrete standards by which all disabilities are evaluated and regulated in our public educational system. Part I introduces the basic topics of assessment, ethics, and assessment types. Part II moves on to provide diagnostic and eligibility criteria according to IDEA categories that are most commonly diagnosed in an educational setting while Part III describes the criteria for IDEA categories most commonly diagnosed in a medical setting. Features like case studies and sample comprehensive evaluations help bring to life assessment and how it applies in real classrooms. Included with this title: The password-protected Instructor Resource Site (formally known as SAGE Edge) offers access to all text-specific resources, including a test bank and editable, chapter-specific PowerPoint® slides.

Choosing a Map Projection Miljenko Lapaine 2017-04-04 This book offers a much-needed critical approach to the intelligent use of the wide variety of map projections that are rapidly and inexpensively available today. It also discusses the distortions that are immanent in any map projection. A well-chosen map projection is one in which extreme distortions are smaller than those in any other projection used to map the same area and in which the map properties match its purpose. Written by leading experts in the field, including W. Tobler, F.C. Kessler, S.E. Battersby, M.P. Finn, K.C. Clarke, V.S. Tikunov, H. Hargitai, B. Jenny and N. Frančula. This book is designed for use by laymen. The book editors are M. Lapaine and E.L. Usery, Chair and Vice-Chair, respectively, of the ICA Commission on Map Projections for the period 2011-2015.

Engineering Management C. M. Chang 2016-11-25 Engineering Management: Meeting the Global Challenges prepares engineers to fulfill their managerial responsibilities, acquire useful business perspectives, and take on the much-needed leadership roles to meet the challenges in the new millennium. Value addition, customer focus, and business perspectives are emphasized throughout. Also underlined are discussions of leadership attributes, steps to acquire these attributes, the areas engineering managers are expected to add value, the web-based tools which can be aggressively applied to develop and sustain competitive advantages, the opportunities offered by market expansion into global regions, and the preparations required for engineering managers to become global leaders. The book is organized into three major sections: functions of engineering management, business fundamentals for engineering managers, and engineering management in the new millennium. This second edition refocuses on the new strategy for science, technology, engineering, and math (STEM) professionals and managers to meet the global challenges through the creation of strategic differentiation and operational excellence. Major revisions include a new chapter on creativity and innovation, a new chapter on operational excellence, and combination of the chapters on financial accounting and financial management. The design strategy for this second edition strives for achieving the T-shaped competencies, with both broad-based perspectives and in-depth analytical skills. Such a background is viewed as essential for STEM professionals and managers to exert a strong leadership role in the dynamic and challenging marketplace. The material in this book will surely help engineering managers play key leadership roles in their organizations by optimally applying their combined strengths in engineering and management.
