*Teaching Young Adult Literature* Thomas W. Bean 2013-02-14 Teaching Young Adult Literature: Developing Students As World Citizens (by Thomas W. Bean, Judith Dunkerly-Bean, and Helen Harper) is a middle and secondary school methods text that introduces pre-service teachers in teacher credential programs and in-service teachers pursuing a Masters degree in Education to the field of young adult literature for use in contemporary contexts. The text introduces teachers to current research on adolescent life and literacy; the new and expanding genres of young adult literature; teaching approaches and practical strategies for using young adult literature in English and Language Arts secondary classrooms and in Content Area Subjects (e.g. History); and ongoing social, political and pedagogical issues of English and Language Arts classrooms in relation to contemporary young adult literature.

*Introduction to General, Organic, and Biochemistry* Morris Hein 1997 The authors recognize that both science and mathematics may be daunting subjects for many students taking this course. With this in mind, they have anticipated where students might stumble, and have paced and organized this text to help them through. Their goal is to make the material

interesting and relevant, so students understand the basic chemical principles related to their career. The authors emphasize problem solving and provide a range of practice exercises. As in previous editions, the text first presents the basic concepts of general chemistry and then moves into organic and biochemistry. In this edition, the first two sections have been revised primarily to improve explanations, and include new pedagogical features. The biochemistry portion has been thoroughly updated to include coverage of many recent developments and emerging technologies in the field.
