Masters Theses in the Pure and
Applied Sciences Wade Shafer

1982 Masters Theses in the
Pure and Applied Sciences was
first conceived, published, and
disseminated by the Center for
Information and Numerical
Data Analysis and Synthesis
(CINDAS) * at Purdue

University in 1957, starting its
coverage of theses with the
academic year 1955. Beginning
with Volume 13, the printing
and dissemination phases of
the activity were transferred to
University Microfilms/Xerox of
Ann Arbor, Michigan, with the
thought that such an
arrangement would be more
beneficial to the academic and

general scientific and technical
community. After five years of
this joint undertaking we had
concluded that it was in the
interest of all concerned if the
printing and distribution of the
volume were handled by an
international publishing house
to assure improved service and
broader dissemination. Hence,
starting with Volume 18,
Masters Theses in the Pure and
Applied Sciences has been
disseminated on a worldwide
basis by Plenum Publishing Cor
poration of New York, and in
the same year the coverage
was broadened to include
Canadian universities. All back
issues can also be ordered from
Plenum. We have reported in
Volume 26 (thesis year 1981) a
total of 11 ,048 theses titles
from 24 Canadian and 21 8
United States universities. We
are sure that this broader base
for these titles reported will
greatly enhance the value of
this important annual
reference work. While Volume

26 reports theses submitted in 1981, on occasion, certain universities do report theses submitted in previous years but not reported at the time.

Proceedings of NECC 1981

Diana Harris 1981 This volume includes the texts of more than 50 papers presented at a conference which was organized to present in one forum all major work regarding computers in education in the United States, as well as abstracts of the special sessions, tutorials, and project presentations which took place at the conference. Among the topics covered in these materials are the following: simulations, videodisc project funding, administration, computer literacy, business, higher education, computer science, humanities, science, social science, preschool/elementary applications, graphics, mathematics, engineering, and health education.
