Data Science and Social Research N. Carlo Lauro 2017-11-17 This edited volume lays the groundwork for Social Data Science, addressing epistemological issues, methods, technologies, software and applications of data science in the social sciences. It presents data science techniques for the collection, analysis and use of both online and offline new (big) data in social research and related applications. Among others, the individual contributions cover topics like social media, learning analytics, clustering, statistical literacy, recurrence analysis and network analysis. Data science is a multidisciplinary approach based mainly on the methods of statistics and computer science, and its aim is to develop appropriate methodologies for forecasting and decision-making in response to an increasingly complex reality often characterized by large amounts of data (big data) of various types (numeric, ordinal and nominal variables, symbolic data, texts, images, data streams, multi-way data, social networks etc.) and from diverse sources. This book presents selected papers from the international conference on Data Science & Social Research, held in Naples, Italy in February 2016, and will appeal to researchers in the social sciences working in academia as well as in statistical institutes and offices.

Intermediate Algebra George Woodbury 2008 "Empower your Students for Success" George Woodbury's Algebra Series empowers students for future success in college-level math courses through its early-and-often approach to functions and graphing, integrated study strategies, and quality exercise sets that encourage true conceptual understanding. The early-and-often approach to functions helps students prepare for future math courses. A Study Skill Strategy is introduced in each chapter opener and then expanded upon throughout the chapter in the Building Your Study Strategy boxes that appear before each exercise set. Students can further develop their study skills with the Study Skills Workbook, written by Alan Bass, to accompany the Woodbury texts. Vocabulary Exercises begin each section of exercises and check student understanding of the basic vocabulary presented in the preceding section.

Elementary Algebra with Early Systems of Equations Tom Carson 2005-02 Tom Carson engages students in the learning process by meeting them where they are and leading them to where they need to be through the determination of their individual learning style, the development of study skills, and the integration of learning strategies that help each student succeed. Elementary Algebra with Early Systems of Equations is a book for the student. The authors' goal is to help build students' confidence, their understanding and appreciation of math, and their basic skills by presenting an extremely user-friendly text that models a framework in which students can succeed. Unfortunately, students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses. Developmental math students often have never developed nor applied a study system in mathematics. To

address these needs, the authors have framed three goals for Elementary Algebra: 1) reduce math anxiety, 2) teach for understanding, and 3) foster critical thinking and enthusiasm. The authors' writing style is extremely student-friendly. They talk to students in their own language and walk them through the concepts, explaining not only how to do the math, but also why it works and where it comes from, rather than using the "monkey-see, monkey-do" approach that some books take. Elementary Algebra with Early Systems of Equations, as the title implies, places the topic of Systems of Equations early in the text, in Chapter 5. This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing, and the chapters prior to polynomials and factoring. For those who prefer to teach the topic later, Elementary Algebra, by the same author team, places Systems of Equations in Chapter 8. Foundations of Algebra; Solving Linear Equations and Inequalities; Problem Solving; Graphing Linear Equations and Inequalities; Systems of Equations; Polynomials; Factoring; Rational Expressions and Equations; Roots and Radicals; Quadratic Equations For all readers interested in elementary algebra.

Algebra 2 Margaret L. Lial 2005-08
