Ethnopharmacological Properties, Biological Activity and Phytochemical Attributes of Medicinal Plants Volume 3

Bharat Singh 2023-10-24 This book covers the morphological characteristics, ethnopharmacological properties, isolated and identified structurally diverse secondary metabolites, biological and pharmacological activities of medicinal plants.

Ethnopharmacology is the systematic study of folklore/traditional medicines, which continue to provide innovative drugs and lead molecules for the pharmaceutical industry. In fact, plant secondary metabolites, used as a single molecule or as a mixture, are medicines that can be effective and safe even when synthetic drugs fail. Therefore, the description of these secondary metabolites as well as methods for the targeted expression and/or purification is of high interest. In addition to surveying the morphological features, ethnopharmacological properties, biological and pharmacological activities, and studies of clinical trials, this book offers a comprehensive treatment of 56 plant species. It also presents the cell culture conditions and various methods used for increasing the production of medicinally important secondary metabolites in plant cell cultures. This volume:

- Provides the morphological features, habitat, and distribution of each species of 56 genera selected from the different regions of the world.
- Presents ethnopharmacological applications of various species of included 56 genera of this book.
- Different species of 56 genera are used for ethnomedicinal uses by the people of various countries of the world.
- Describes structures of various secondary metabolites identified in 56 plant species together with their biological and pharmacological activities.
- Discusses strategies of secondary metabolites production, such as organ culture, pH, elicitation, hairy root cultures, light, and mutagenesis.
- Provides a complete overview of each species of 56 genera and complete information up to year 2022.

Ethnopharmacological Properties, Biological Activity and Phytochemical Attributes of

Medicinal Plants is an important book for undergraduate and postgraduate students, pharmacologists, phytochemists, Ayurvedic practitioners, medical doctors, and biotechnologists interested in the ethnopharmacological properties, phytochemistry, and biological and pharmacological activities of plants.

Case Studies in Biocultural Diversity from Southeast Asia F. Merlin Franco 2022-07-27 This open access book demonstrates the linkages between local languages, traditional knowledge, and biodiversity at the landscape level in Asia, providing a fresh approach to discussions on Asia's biocultural diversity. The book carries forward earlier analyses but importantly focuses on 'traditional ecological calendars,' 'folk medicine,' and 'folk names' in the context of the vital importance of maintaining biological, cultural, and linguistic diversity. It does this by addressing a range of cases and issues in

relation to Southeast Asia: Brunei Darussalam, Indonesia, Malaysia, the Philippines, and North-East India. The several chapters demonstrate the ways in which the various forms of knowledge of the environment and its categorizations are important in areas such as landscape and resource management and conservation. They also demonstrate that environmental knowledge and the practical skills which accompany it are not necessarily widely shared. This book sends important messages to those who care about the sustainability of our environment, the maintenance of its biocultural diversity, or at least the maintenance of what remains of it because much has changed. This interdisciplinary collection draws from a wide range of disciplines and is of appeal to students and scholars in anthropology, environmental studies, geography, biodiversity, and linguistics.
