

Big Java Solutions Manual For

Java Harvey M. Deitel 1999
Completely revised and updated to cover the new features in the 1.2 release of Java, this book is a comprehensive look at learning how to program in Java. The book covers all facets of the Java language, including object-orientation, multithreading, exception-handling, the new event model, the graphics capabilities of the new Abstract Windows Toolkit, and the new APIs.

An Introduction to Java Programming Y. Daniel Liang 1998 Software -- Programming Languages.

Programming with Java Julia Case Bradley 2002 Java has become one of the leading development languages today. It plays a very important role in application development for business as well as a tool for Web programming. This Java text is designed primarily for business programming students. It assumes no prior programming experience and introduces students to the object-oriented approach from the very beginning. This text can be used for a first language course or for a more advanced programming course.

Building Embedded Linux

Systems Karim Yaghmour

2003-04-22 Linux(r) is being
adopted by an increasing
number of embedded systems
developers, who have been
won over by its sophisticated
scheduling and networking, its
cost-free license, its open
development model, and the

support offered by rich and
powerful programming tools.
While there is a great deal of
hype surrounding the use of
Linux in embedded systems,
there is not a lot of practical
information. Building
Embedded Linux Systems is
the first in-depth, hard-core
guide to putting together an
embedded system based on the
Linux kernel. This
indispensable book features
arcane and previously
undocumented procedures for:
Building your own GNU

an efficient embedded
development framework
Selecting, configuring,
building, and installing a
target-specific kernel Creating
a complete target root
filesystem Setting up,
manipulating, and using solid-
state storage devices Installing

configurations, including a thorough review of Linux's support for embedded hardware. All explanations rely on the use of open source and free software packages. By presenting how to build the operating system components from pristine sources and how to find more documentation or help, this book greatly simplifies the task of keeping complete control over one's embedded operating system, whether it be for technical or sound financial reasons. Author Karim Yaghmour, a well-known designer and speaker who is responsible for the Linux Trace Toolkit, starts by discussing the strengths and weaknesses of Linux as an embedded operating system. Licensing issues are included, followed by a discussion of the basics of building embedded Linux systems. The configuration, setup, and use of over forty different open source and free software packages commonly used in embedded Linux systems are also covered. uClibc, BusyBox, U-Boot, OpenSSH, tftpd, tftp, strace,

and gdb are among the packages discussed.

Conquering Big Data with High Performance

Computing Ritu Arora

2016-09-16 This book provides an overview of the resources and research projects that are bringing Big Data and High Performance Computing (HPC) on converging tracks. It demystifies Big Data and HPC for the reader by covering the primary resources, middleware, applications, and tools that enable the usage of HPC platforms for Big Data management and processing. Through interesting use-cases from traditional and non-traditional HPC domains, the book highlights the most critical challenges related to Big Data processing and management, and shows ways to mitigate them using HPC resources. Unlike most books on Big Data, it covers a variety of alternatives to Hadoop, and explains the differences between HPC platforms and Hadoop. Written by professionals and researchers in a range of departments and
