Ceratocystis and Ophiostoma

Michael J. Wingfield 1993 "This book is based on a symposium held in Bad Windsheim, Germany, in Aug. 1990. The 30 chapters are grouped into 5 sections. Part I concerns morphological taxonomy of the ophiostomatoid fungi, including their anamorphs. In Part II, nonmorphological taxonomic approaches are considered, including genetic, biochemical, developmental and molecular characters. In Part III, the pathological aspects are introduced, beginning with considerations of saprobic growth and progressing through tree diseases to human diseases. Part IV includes reviews of a variety of insect vector systems and host responses to both the insects and the fungi. A few chapters, including information on methods for handling ophiostomatoid fungi, a key for their identification and a list of described species, were not presented at the symposium."--pub. desc.
