Against the People Bryan Evans 2025-02-13T00:00:00Z The election of the Doug Ford-led Progressive Conservatives unleashed an aggressive and undisguised market fundamentalism. Ford's government has taken the assault against the social welfare state, labour and environmental protections to new and unprecedented heights. Maintaining a permanent era of austerity has not only steadily reduced the public sector as a proportion of the provincial economy but has also reduced the social protections available to Ontarians. Ford's deregulatory agenda has explicitly degraded the quality of social provisioning and eroded labour rights to the benefit of business. From undermining the fiscal capacity to fund program expenditures adequately to reducing public sector employment and service levels, Ford Nation has reordered an array of ministries and agencies to boost business and development in general and the resource-extraction and investment sectors in particular. Tens of billions have been put back into the pockets of the business community, often directly out of public coffers. Few ministries and programs have been left unscathed. Most people have not benefited. *Against the People* is the first book of its kind to provide an in-depth look into the devastating policies of the Ford government across a wide range of public policy issues: from health care, municipal, education and judicial restructuring, to economics, arts, labour, environmental, housing and Indigenous lands. Written by on-the-ground experts and focused on the Progressive Conservatives since coming to power in 2018, this book showcases the politics of dismantling a province.

Managing Projects for Success Albert Hamilton 2001 The influences of modern technology and competitive environments have a direct impact on the outcomes of projects, irrespective of project type. This text is a response to the growing need for better management which many people find necessary when leading or working within teams or groups undertaking a project. Increasingly, people in a working environment are engaged in organised practices and utilising resources, facing the challenge of having to meet, or better, predetermined cost budgets and strict timetables. The fact that most work is organised into programs or singular projects means that people require increasing guidance in project management.
