Going Gradeless, Grades 6-12 Elise Burns 2021-02-23 "Grade reform and standards-based grading (SBG) is a hotly debated issue in education. As one high school administrator puts it, "Traditional letter grading is probably the biggest elephant in the room in regard to school reform. We start [grading] at a young age, and it becomes all about accumulating points, and it's not about the learning anymore." (Dan Kelley, principal of Smithfield High School, Rhode Island). When students can focus less on the score and more on the learning, great things happen. SBG is even more challenging in high school. In this book, the authors share their districts' successes moving to alternate assessment methods that promote learning rather than solely achievement. The proponents of grade reform highlight the arbitrary nature of grades, the undue stress experienced by some learners, and the potential interference in the process of learning. On the other hand, opponents reference the lack of accountability and a shift away from content knowledge that is perceived in many alternate assessment models. This book outlines how to remove the negative impacts of grades while still maintaining a high level of accountability. While the majority of other books in this space provide a rationale for why the shift is necessary, these authors provide the classroom teacher's perspective and concrete examples of how these approaches can be developed and applied. They provide sample assessments, student work samples, an accountability checklist, a sample of their rubrics, and a review of our collected data"--

Social Justice in the U.S.-Mexico Border Region Mark Lusk 2012-06-12

The U.S.-Mexico Border Region is among the poorest geographical areas in the United States. The region has been long characterized by dual development, poor infrastructure, weak schools, health disparities and low-wage employment. More recently, the region has been affected by the violence associated with a drug and crime war in Mexico. The premise of this book is that the U.S.-Mexico Border Region is subject to systematic oppression and that the so-called social pathologies that we see in the region are by-products of social and economic injustice in the form of labor exploitation, environmental racism, immigration militarism, institutional sexism and discrimination, health inequities, a political economy based on low-wage labor, and the globalization of labor and capital. The chapters address a variety of examples of injustice in the areas of environment, health disparity, migration unemployment, citizenship, women and gender violence, mental health, and drug violence. The book proposes a pathway to development.
