African American Architects

Dreck Spurlock Wilson

2004-03-01 African-American

architects have been designing

and building houses and public

buildings since 1865. Although

many of these structures

survive today, the architects

themselves are virtually

unknown. This unique

reference work brings their

lives and work to light for the

first time. Written by 100

experts ranging from

architectural historians to

archivists, this book contains

160 biographical, A-Z entries

on African-American architects

from the era of Emancipation

to the end of World War II.

Articles provide biographical

facts about each architect, and

commentary on his or her work. Practical and accessible, this reference is complemented by over 200 photographs and includes an appendix containing a list of buildings by geographic location and by architect.
