Americas: Study Guide Bernadette M. Orr 1993 The study guide bridges all course components and lists the learning objectives of each of the course units. Each chapter corresponds directly to one of the 13 course units. The first two chapters provide essential background on the series themes, including general history and geography. The succeeding 10 chapters follow the progression of the television series, expanding on the material covered in the programs and providing cross-references for textbook assignments. The final unit sums up the main points presented in the television course and reviews students' knowledge. Each chapter of the study guide begins with a brief unit summary, followed by a list of critical thinking questions that address the learning objectives and an overview that integrates the program with the readings. In addition, each study guide chapter includes a glossary of key English, Spanish, and Portuguese words, with pronunciations, learning objectives, self-test questions and references to books, films, and other activities.

Doom Patterns Maia Gil'Adí 2024-11-01 In *Doom Patterns*, Maia Gil'Adí takes up speculative fiction as a site for theorizing Latinx identity across national and ethnic borders and shows the vital role of historical trauma in its formation. Her analysis moves beyond reparative modes of reading

to consider how literary representations of violence, destruction, and pain also elicit pleasurable affective and aesthetic experiences. Gil'Adí theorizes the paradox of pleasurable violence through the notion of doom patterns—narrative devices that include thematic repetition, nonlinear narration, character fragmentation, and unresolved plots. Doom patterns return the reader to instances of historical violence and destruction, revealing them as excessive and otherworldly processes that require the tropes of speculative fiction. Examining novels by established Latinx authors such as Junot Díaz and Cristina García as well as multiethnic writers such as Colson Whitehead and Sesshu Foster, Gil'Adí challenges definitions of what constitutes Latinx literature and notions of the speculative by dismantling generic boundaries and entrenched definitions of race, ethnicity, and nationhood. In so doing, she allows for a more capacious consideration of the speculative, realism, history, and the role of violence in literature.

Handbook of Latin American Studies Dolores Moyano Martin 1999-01-01 Beginning with volume 41 (1979), the University of Texas Press became the publisher of the Handbook of Latin American Studies, the most comprehensive annual bibliography in the field. Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the Handbook alternates from year to year between social sciences and humanities. The Handbook annotates works on Mexico, Central America, the Caribbean and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research under way in specialized areas. The Handbook of Latin American Studies is the oldest continuing reference work in the field. Dolores Moyano Martin, of the Library of Congress Hispanic Division, has been the editor since 1977, and P. Sue Mundell was assistant editor from 1994 to 1998. The subject categories for Volume 56 are as follows: ∑ Electronic Resources for the Humanities ∑ Art ∑ History (including ethnohistory) ∑ Literature (including translations from the Spanish and Portuguese) ∑ Philosophy: Latin American Thought ∑ Music *Britannica Junior Study Guides* 1957

Sources and Methods in Indigenous Studies Chris Andersen 2016-12-19 Sources and Methods in Indigenous Studies is a synthesis of changes and innovations in methodologies in Indigenous Studies, focusing on sources over a broad chronological and geographical range. Written by a group of highly respected Indigenous Studies scholars from across an array of disciplines, this collection offers insight into the methodological approaches contributors take to research, and how these methods have developed in recent years. The book has a two-part structure that looks, firstly, at the theoretical and disciplinary movement of Indigenous Studies within history, literature, anthropology, and the social sciences. Chapters in this section reveal that, while engaging with other disciplines, Indigenous Studies has forged its own intellectual path by

borrowing and innovating from other fields. In part two, the book examines the many different areas with which sources for indigenous history have been engaged, including the importance of family, gender, feminism, and sexuality, as well as various elements of expressive culture such as material culture, literature, and museums. Together, the chapters offer readers an overview of the dynamic state of the field in Indigenous Studies. This book shines a spotlight on the ways in which scholarship is transforming Indigenous Studies in methodologically innovative and exciting ways, and will be essential reading for students and scholars in the field.
