ICCWS 2016 11th International Conference on Cyber Warfare and Security Dr Tanya Zlateva and Professor Virginia Greiman 2016 The 11th International Conference on Cyber Warfare and Security (ICCWS 2016) is being held at Boston University, Boston, USA on the 17-18th March 2016. The Conference Chair is Dr Tanya Zlateva and the Programme Chair is Professor Virginia Greiman, both from Boston University. ICCWS is a recognised Cyber Security event on the International research conferences calendar and provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual and empirical advances in the area of Cyber Warfare and Cyber Security. It provides an important opportunity for researchers and managers to come together with peers to share their experiences of using the varied and expanding range of Cyberwar and Cyber Security research available to them. The keynote speakers for the conference are Daryl Haegley from the Department of Defense (DoD), who will address the topic Control Systems Networks...What's in Your Building? and Neal Ziring from the National Security Agency who will be providing some insight to the issue of Is Security Achievable? A Practical Perspective. ICCWS received 125 abstract submissions this year. After the double blind, peer review process there are 43 Academic Research Papers 8 PhD papers Research papers, 7 Masters and 1 work-in-progress papers published in these Conference Proceedings. These papers represent work from around the world, including: Australia, Canada, China, Czech Republic, District of Columbia, Finland, France, Israel, Japan, Lebanon, Netherlands, Pakistan, Russian Federation, Saudi Arabia, South Africa, Turkey, United Arab Emirates, UK, USA.

Network and Information Systems (NIS) Regulations - A pocket guide for digital service providers Alan Calder 2018-11-01 This pocket guide is a primer for any DSPs (digital service providers) that needs to comply with the NIS Regulations, and explores who they are, and why the NIS Regulations are different for them.

Strategic Cyber Defense Yasir Gokce 2017-07-15 With the increased dependence on digital and internet technologies, cyber security has come to be regarded as a national security issue, and the number of countries with a published cyber security strategy continues to rise. But these national cyber security strategies often run the risk of failing to address all the cyber security requirements of the many institutions within a given country, and the complex nature of the stakeholders involved and the networks formed by them means that the problem requires an interdisciplinary approach. This book presents papers from the NATO Advanced Research Workshop (ARW) entitled "A Framework for a Military Cyber Defense Strategy", held in Norfolk, Virginia, USA, in April 2016. The workshop focused on key priority areas for cyber defense along with NATO's cyber defense policy implementation and brought together experts with an eclectic mix of backgrounds and specialties from a group of NATO member states and partner countries. The participants considered not only the technical implications of cyber security efforts, but also the legal, strategic, educational and organizational aspects, and the book reflects this wide view of the field and its intricacies, highlighting the complexity of cyber security and the many challenges it presents. This overview of cyber security offers state-of-the-art approaches from a multidisciplinary standpoint, and will be of interest to all those working in the field.

Human Rights and 21st Century Challenges Dapo Akande 2020-01-31 The world is faced with significant and interrelated challenges in the 21st century which threaten human rights in a number of ways. This book examines three of the largest issues of the century - armed conflict, environment, and poverty - and examines how these may be addressed using a human rights framework. It considers how these challenges threaten human rights and reassesses our understanding of human rights in the light of these issues. This multidisciplinary text considers both foundational and applied questions such as the relationship between morality and the laws of war, as well as the application of the International Human Rights Framework in cyber space. Alongside analyses from some of the most prominent lawyers,

philosophers, and political theorists in the debate, each section includes contributions by those who have served as Special Rapporteurs within the United Nations Human Rights System on the challenges facing international human rights laws today.

Cyber Operations and International Law François Delerue 2020-03-19 This book offers a comprehensive overview of the international law applicable to cyber operations. It is grounded in international law, but is also of interest for non-legal researchers, notably in political science and computer science. Outside academia, it will appeal to legal advisors, policymakers, and military organisations.
