Making the Most of Small Groups Debbie Diller
2023-10-10 Author Debbie Diller turns her attention to small reading groups and the teacher's role in small-group instruction. *Making the Most of Small Groups: Differentiation for All* grapples with difficult questions regarding small-group instruction in elementary classrooms such as: How do I find the time? How can I be more organized? How do I form groups? How can I differentiate to meet the needs of all of my students? Structured around the five essential reading elements - comprehension, fluency, phonemic awareness, phonics, and vocabulary - the book provides practical tips, sample lessons, lesson plans and templates, suggestions for related literacy work stations, and connections to whole-

group instruction. In addition to ideas to use immediately in the classroom, Diller provides an overview of relevant research and reflection questions for professional conversations.

Literacy Teaching and Learning Zhihui Fang 2005

Organized into 10 thematic sections, the 30 carefully selected articles and accompanying pedagogical features enable students to gain an in-depth understanding of and practical ideas about current trends and issues in literacy teaching and learning. This text is a must-read for preservice teachers, in-service teachers, graduate students of literacy and related fields, and alternative teaching candidates seeking reading endorsement or certification."--Jacket.

Human Learning Jeanne Ellis Ormrod 1999 This leading book

in learning theories explains principles and theories of human learning in a lucid and engaging fashion and lays out the application of those theories and principles to educational practice. Covers many topics throughout the book: chaining, cognitive aspects of applied behavior analysis, constructivist and contextual views of learning, effects of verbalization and enactment, dichotomies in long-term memory, mental theories, development of expertise, effects of alternative forms of assessment, self-regulated learning and epistemological beliefs, self-worth theory, and internalized motivation.

After Early Intervention, Then What? Teaching Struggling Readers in Grades 3 and Beyond Rachel L. McCormack 2005-01-18 For courses in Elementary Reading Methods, Literacy in the Elementary School, and Literacy Tutoring. Even with effective early interventions,

many students continue to need expert and intensive reading instruction well beyond the primary-grade years. Now intermediate and middle school educators and pre-service teachers have a resource to help them develop instructional strategies for these students. The contributors to this volume draw from research and classroom practice as they share strategies that work for readers who continue to struggle in grades 3-8. Readers will learn how to address the needs of children in a range of instructional settings and learning contexts, and gain a solid understanding of the current state of knowledge on struggling readers and the multiple pathways they can take to help them succeed.

treatment of the core issues in measurement in an easy-to-read and easy-to-comprehend way. In preparing readers to become independent users of test information, it describes problems in measurement, explains how these problems are approached and solved, surveys a broad range of sources, and provides guidance in how to find, evaluate, and integrate information about specific tests. This book focuses on the basic issues in measurement. Offers an exceptionally readable presentation that does not require extensive math background. Makes frequent cross references to related topics found in other chapters. Increases emphasis on the assessments used by counselor/school psychologist.

Teaching Science for All

Children 2005 This compact, paperback volume provides preservice teachers with STRATEGIES AND METHODS of teaching science in the K-8 classroom using Inquiry. The authors integrate the NSE standards, constructivism, and technology, into their popular "E" approach to teaching. Exploration, Explanation, Expansion, and Evaluation make up the 4 "E's" of the learning cycle model first invented by Robert Karplus as part of the Science Curriculum Improvement Study in the 1960s. *Teaching Science for All Children: Inquiry Methods for Constructing Understanding* provides methods for future teachers to foster awareness among their students of the nature of science; to implement skills in the classroom using science inquiry processes; and to develop in their students an understanding of the interactions among science, technology, and society.
