Handbook of Obstetric Emergencies (Second Edition)
DR GUNASEGARAN RAJAN
2025-03-01 We are delighted to present the second edition of this Handbook in Obstetric Emergencies. The first edition had 3 reprints with almost 3,000 copies sold both in Malaysia and overseas. The Mandarin version has sold close to 1,000 copies in China. We have kept the preface to the first edition as it still captures the essence of the content. This updated handbook has revised content on most of the chapters incorporating new guidelines and evidence to ensure you have the most recent information at hand. These guidelines are sourced from the leading health organisations and the global obstetrics and gynaecology societies. The chapters have been critically reviewed by

leaders in the field to whom we extend our gratitude. Some of the topics have been redesigned to appear in the appendix to align with the curriculum that is being conducted at the onsite Intensive Course in Obstetric Emergencies (ICOE). This handbook serves as an indispensable resource for all the participants at the course and is complemented by videos and podcast via the QR code embedded in the chapters. The handbook has a design makeover with softer tones to provide a more appealing appearance. It is true that, there are an abundance of digital resources available for obstetric emergencies. We argue that there is still an enduring place for physical handbook for ease and quick reference of important information during emergencies. It is sad that the recent WHO data show mothers still die in childbirth and it is hoped this handbook will be a useful resource to obstetricians and midwives as it endeavours to provide a clear

medical approach during critical moments in childbirth.

Oxford Handbook of Pre-Hospital Care Ian Greaves 2006-12-21 The Oxford Handbook of Pre-hospital Care provides the reader with authoritative, evidence-based advice on the assessment and management of pre-hospital care emergencies. It is designed to provide information for all immediate care practitioners including doctors, paramedics, emergency care practitioners, nurses and voluntary aid society members. The Oxford Handbook format and its pocket size make its content readily accessible and it can be carried easily in jackets or other personal protective clothing. Each section defines the important clinical features of the named condition and

includes boxes containing essential advice. The treatment section incorporates national and international guidelines and protocols where available and reflects contemporary best practice. Topics include scene safety, personal protective equipment, basic and advanced life support, head injuries, chest injuries, abdominal and pelvic injuries, spinal injuries, musculoskeletal injuries, medical emergencies, mass gathering incidents, major incidents, burns and related problems. The authors have broad experience in pre-hospital care including civilian and military practice in various fields including medical emergencies, road traffic collisions, entrapments, ballistic trauma and major incidents. This is the essential quick-reference guide to pre-hospital medicine!

Advances in Medical Education
A.J.J.A. Scherpbier 2012-12-06
About 550 registrants from 51 different countries attended the Seventh Ottawa Conference on Medical Education and Assessment in Maastricht. We received 525 abstracts for the conference, divided in thematic poster sessions and platform presentations. Organising the conference was an honour and we tried to meet the high standards of a friendly and relaxed atmosphere which has characterized previous Ottawa conferences. During and after the conference about 250 papers were submitted for publication in the conference

proceedings, leaving us little time for a post-conference depression. Despite the large number of papers, the editors have attempted to review and edit the papers as care fully as possible. Occasionally, however, correspondence exceeded reasonable deadlines, preventing careful editing of a small number of the papers. Although we felt that our editorial task was not quite finished, we nevertheless decided to include these papers. We thank the many authors for their enthusiastic and prompt response to - occasionally tedious - editorial suggestions and requests. We are sure that this collective effort has resulted in a book that will make an important contribution to the field of medical education. The editors want to thank Jocelyn Flippo-Berger whose expertise with desk top publishing and perseverance was a great help.
