The Cambridge Companion to Literature in a Digital Age Adam Hammond 2024-11-14 Literature has experienced two great medium shifts, each with profound implications for its forms, genres, and cultures: that from orality to writing, and that from writing to printing. Today we are experiencing a third shift, from printed to digital forms. As with the previous shifts, this transformation is reconfiguring literature and literary culture. The Cambridge Companion to Literature in the Digital Age is organized around the question of what is at stake for literary studies in this latest transition. Rather than dividing its chapters by methodology or approach, this volume proceeds by exploring the major categories of literary investigation that are coming under pressure in the digital age: concepts such as the canon, periodization, authorship, and narrative. With chapters written by leading experts in all facets of literary studies, this book shows why all those who read, study, and teach literature today ought to attend to the digital.

Architecture 2004

Architectural Drawing Rendow Yee 2012-07-31 The classic architectural drawing compendium now in a richly updated edition Today's most comprehensive compendium of architectural drawing types and methods, both hand drawn and computer generated, *Architectural Drawing: A Visual Compendium of Types and Methods* remains a one-of-a-kind visual reference and an outstanding source of guidance and inspiration for students and professionals at every level. This Fourth Edition has been thoroughly updated to reflect the growing influence of digital drawing. Features include: More than 1,500 drawings and photographs that demonstrate the various principles, methods, and types of architectural drawing Examples by an impressive array of notable architects and firms, including Tadao Ando, Asymptote, Santiago Calatrava, Coop Himmelb(l)au, Norman Foster, Frank Gehry, Zaha Hadid, Steven Holl,

Arata Isozaki, Toyo Ito, Gudmundur Jonsson, Kohn Pedersen Fox, Ricardo Legorreta, Morphosis, Patkau Architects, Pei Partnership Architects LLP, Renzo Piano, Antoine Predock, SANAA, David Serero, Studio Daniel Libeskind, Studio Gang, Bing Thom, Tod Williams and Billie Tsien, and UN Studio A brand new chapter, "Introduction to the Digital-Manual Interface" which covers how digital and traditional drawing techniques can be used in conjunction with each other A new chapter on guidelines for portfolio building Content organized in a streamlined, easy-to-use fashion Supplementary online instructor resources, including PowerPoint slides tied to the book "This volume reveals how architects approach drawing as a process wherein ideas are given form. As a tool for teaching, these examples become important in students' understanding of the formal and technical aspects of design thought. In an age of digital technologies, this work emphasizes the intimate relationship that exists between the drawing and its maker, the process between paper, hand, and mind." LaRaine Papa Montgomery, Professor of Architecture/Graphics Coordinator, Savannah College of Art and Design "This book contains a wealth of information on architectural graphic communication. My students have found this to be an invaluable resource for graphic presentation techniques ranging from traditional hand drawing to advanced computer graphics. It features an amazingly wide range of examples including both student work and professional work by renowned architects. With the addition of a new chapter on portfolio design, this new edition illustrates the full gamut of graphic communication skills from the conceptual sketch through the documentation of the final portfolio." Mark A. Pearson, AIA, LEED AP, Associate Professor of Architecture, College of DuPage "This book should be in the library of all architecture and design students as well as practicing professionals. The richness and variety of hand-drawn and digital illustrations by students and architects offers deep insight into the

many drawing types and methods used today. The section on portfolios is a helpful and timely addition." Professor Michael Hagge, Chair, Department of Architecture, The University of Memphis
Drafting Fundamentals for the Entertainment Classroom Eric Appleton 2021-11-22 Drafting Fundamentals for the Entertainment Classroom: A Process-Based Introduction to Hand Drafting, Vectorworks, and SketchUp guides students through a syllabus-formatted semester of integrated drafting concepts and skills. This book links beginner visualization practices with fundamental software knowledge through step-by-step exercises and examples. By presenting hand drafting and Vectorworks through incremental exercises, students not only gain an understanding of the tools used in drafting but also learn why the tools, practices, and standards exist in the first place. SketchUp, a user-friendly 3D modeling program, is integrated into the various exercises to help readers visualize concepts and begin modeling their own ideas. By the end of the book, students will understand drawing construction techniques, United States Institute for Theatre Technology (USITT)-recommended graphic standards, and the typical drawings created for entertainment design, preparing them to dive more deeply into the further complexities and opportunities of Vectorworks and SketchUp. Drafting Fundamentals for the Entertainment Classroom is written to complement a 14- or 15-week semester of an Entertainment Drafting course. The book's format also provides structure for independent and self-directed study.

The Architectural Drawing Course Mo Zell 2008 This practical foundation course in architectural design offers key advice on the principles, practice and techniques of the subject. Dealing with much more than just the technical aspects of drawing, it introduces the reader to the visual language of architecture, encouraging them to think spatially and question the built environment. All architecture students, and anyone interested in the creative side of architecture, will find this book an invaluable tool and reference.

Design Studio One: A Collection of Short Stories Zachary Elliott 2017-07-03 The architectural design studio is one of the most unique places in the world. For over a century, students who desire to become architects have attended these prestigious studios to learn and experience the fundamentals of architecture and design. They challenge the student's ability to manage multi-variable conditions under intense time restraints and teach them lessons about the roles that hard work and perseverance play in creating a successful design. But more than anything, these studios have provided students with friendships that last a lifetime. The School of Architecture at Oklahoma State University, one of the top architecture schools in the nation, is no exception. In this book series, follow me and my classmates as we embark on our new journey through OSU's five year architecture program and its eight design studios. Written in a short story format, this series recounts the true events of design studio through a student's perspective. Design Studio One is the story of how it all began.
