The Autodesk Architectural Desktop 3 Book H. Edward Goldberg 2002 "The Autodesk Architectural Desktop 3 Book: A Comprehensive Guide" provides a hands-on, guided tutorial through Architectural Desktop 3. Commands and concepts are presented in the order in which they are commonly used, which provides a logical organization to the text. Numerous walk-throughs and hands-on activities are used throughout the text to teach commands in relation to the production of architectural drawings. The organization of topics and the presentation of commands in the context of applications make this text appropriate for both the traditional classroom and self-paced instruction. The following features support the use of the text in multiple settings: Numerous exercises are provided throughout the text. Step-by-step illustrations are used to highlight concepts, menus, and program screens. Useful tips and tricks to enhance the productivity of t* users are included.

Mastering Autodesk Architectural Desktop, 2005 Paul F. Aubin 2005 This concise manual goes beyond a series of independent tools and commands to consider the process of creating professional-quality building design projects using the newest release of Autodesk Architectural Desktop (ADT). Content focuses squarely on the rationale and practicality of ADT 2005 through life-tested, practical lessons that emphasize "why" as well as "show" in order to help readers complete their projects successfully. The text and lessons combine to give an unmistakable sense of the value of the tools introduced as well as a clear indication of each tool's potential. The result is an up-to-the-minute resource that shortens the learning curve and instills confidence and comfort in usage of the software to create architecture.

Local Positioning Systems Krzysztof W. Kolodziej 2017-12-19 Local Positioning Systems: LBS Applications and Services explores the possible approaches and technologies to location problems including people and asset tracking, mobile resource management, public safety, and handset location-based services. The book examines several indoor positioning systems, providing detailed case studies of existing applications and their requirements, and shows how to set them up. Other chapters are dedicated to position computation algorithms using different signal metrics and determination methods, 2D/3D indoor map data and location models, indoor navigation, system components and how they work, privacy, deployment issues, and standards. In detail, the book explains the steps for deploying a location-enabled network, including doing a site-survey, creating a positioning model and floor maps, and access point placement and configuration. Also presented is a classification for network-based and ad-hoc positioning systems, and a framework for developing indoor LBS services. This comprehensive guide will be invaluable to students and lecturers in the area of wireless computing. It will also be an enabling resource to developers and researchers seeking to expand their knowledge in this field.
